

**Angel** spent 19 years of her life mostly ridiculed by friends and schoolmate due to her facial deformity and almost stopped going to school. Despite of this handicap she kept on attending classes. Her family could not afford her treatment. She lived more than 15 hours away from the nearest health care facility that offered cleft care. A neighbor heard about Smile Train's program and funded her transportation to the center for treatment. After the surgery she told us that this was the best high school graduation gift ever!

At 33 years old, **Jonathan** never thought that he would receive a life changing surgery. He would often hide when approached by people and thought that this was a curse beset upon him. He lived his life as a hermit tending crops for his daily needs. His neighbour heard about smile train from the dailies. He spent his life savings on transportation to the center. After surgery he remarked that now he can look for a soul mate.

We were informed by the orphanage that **Christopher** was abandoned by his parents. The orphanage care givers heard about Smile Train and sent the infant to Cleftworks Association. Now has a better chance to be adopted by a loving family.
