Dear Mr. Toporek,

I am writing this letter to thank you for your service and equipment. I work for a non-profit in Philadelphia whose mission is to provide the necessary skills to succeed in this ever-changing technological workforce to underserved communities.

The 15 laptops that we purchased from your organization will be used specifically for participants, ages 18-24, who have had some kind of run-in with the law, also known as the re-entry population. These participants will be using these laptops to gain their high-school diplomas, become certified in retail training, job search, and anything else we see needed for them to be successful in gaining employment.

I truly appreciate your organization and what you are able to provide to us at the cost that fit our budget. Being non-profit, we look for opportunities to stretch our budget while providing quality in our training delivery and TeamChildren has definitely helped with that mission. I hope to do more business with you in the future.

Very sincerely,

Tasha Julius  
Workforce Administrative Coordinator
