

INDONESIAN SPECIES CONSERVATION PROGRAM

1. Short Information ISCP NgO's

- NgO's Name** : Indonesian Species Conservation Program (ISCP)
NgO's Logo : the head of sumatran laughinthrush circle.
Founded : 18 November 2011.
Akta notaris lembaga swadaya masyarakat :
18.11.2011, Nomor 8. Kantor Notaris Jansiman
Purba,SH NOTARIS & P.P.A.T – S.K.Men.Keh
& HAM RI NO.C-1449.HT.03.01-Th.2002 Tgl.28
OKTOBER 2002. SK Ka.BPN No.29- XVII-2006
Tgl.18-12—2006.
- Founder** : Rudianto Sembiring
- Address** : Jl Lada I No 1 Perumnas Simalingkar 20353 Medan Sumatra
Utara ,Indonesia.
- Rehabilitation
center address** : Jl Pik pik desa Bandarbaru kecamatan Sibolangit Kabupaten
Deli Serdang Sumatra Utara.

2. ISCP Founded History

ISCP (Indonesia Species Conservation Program) is an independent, non-profit organisation , national and international networking with goal to protection and rescue of a wide variety of wildlife species both protected or non protected, endangered or not or who have entered the list of crisis. ISCP activities are non-political and non-violent and do not look at race, nation and religion in implementing at the activities.ISCP founded in 2011 in Medan, North Sumatra Indonesia.Activities of ISCP is education, socialization, help the investigation together with the relevant authorities whether it Forestry departments or officials or other competent authority, and rescue a variety of animal species. ISCP motivated established fact that Indonesia is one country that has the highest biodiversity in the world, but unfortunately Indonesia also has the longest list of endangered wildlife. Habitat destruction and over-exploitation is a major cause Indonesian wildlife threatened with extinction. This condition is further exacerbated by the weakness of public awareness of the importance of wildlife and habitat conservation. If it is allowed to continue it will be more and more species of wildlife that will be completely eradicated from nature. Wildlife extinctions this would trigger other natural damage, which in turn will have a negative impact to human life. So for it ISCP is necessary to get involved in protecting wildlife species and other wildlife animals who really needed allows for the preservation of fauna and natural and consistent work in this area. ISCP view wildlife preservation or non-wild is the entrance to preserve nature in general, which in turn will provide a better life for the people of Indonesia and the human race globally.

3. ISCP's vision is:

To rescue and protection of animals from the dead either due from poaching, torture and others that lead to the extinction of the species of the earth's surface by involving the participation people and participation of others community.

4. ISCP's mission is:

- As a means to move the container or concern and participation of the community to always love and protected wildlife.
- Build an opinion and appropriate action will be handling as well as animal rescue or to explore the potential and depth of information to learn how to keep the animals and know the ins and outs of animal life.
- Is a movement that aims to protect and rescue the animals, especially to the almost extinct wildlife.

5. ISCP network:

ISCP establish a close and good relationship with ZOO Liberec in Czech republic in implementing programs in the field of in situ conservation of wildlife species, in Philipina Taralak Foundation which is a foundation breeding birds as partners in terms of species of birds (Aves) and ProFauna Indonesia, which is one spirit of the early formation of this organization. And will be open again to the future seide parties and aligned in terms of handling and rescue a variety of animal species

6. The Structural ISCP Membership is:

Advisory Board

1. Diana wright
2. Tomas Ouhel
3. David Nejedlo
4. Simon Bruslund

Founder / Executive Director

Rudianto.Sembiring (Executive Director)

Tomas Ouhel (Advisory Board)

Entomophagy /Poksai Coordinator

Thomas Busina

Bird External Expert

Pavel Hospodarstky

Project Kukang Coordinator

Frantisek Pribstky

Future plan for pangolin Coordinator

Louise Fletcher

English Class for Kids Coordinator in Center (Education devison)

Novitha Sari Bangun

Animal Keeper :

1. Muhammad Agus
2. Komar

7. The achievement has been achieved .

1. 2/2011 - 9/2012

Identification of mollucan iron wood (*Intsia bijuga*) "(Identifizierung von Holzherkünften) (BLE 2808HS023)

Contact confirmation Benyamin Hayes (ben9hayes@yahoo.co.uk)

And Dr. Bernd Degen Direktor dan Profesor Johann Heinrich von Thünen- Institut (VTI) Institut für Forstgenetik -Sieker Landstr. 2, 22927 Grosshansdorf Jerman (bernd.degen@vti.bund.de).

2. 7/2013 - 12/2013

Work for field work assistant to Mr Bert Haris Postdoctoral Research Associate, Program knowledge, Tecnology & environment Woodrow Wilson School of Public & International Affairs 405A Robertson Hall, Princeton University, Princeton, NJ 08544, USA.

Contact confirmation Bert Haris (Aramidopsis @ gmail. com)

3. 2014

Success make documenter film Nias Hill Myna/ Beo nias:

<https://www.youtube.com/watch?v=1kwJnT5nL5k&spfreload=10>

4. 1/2014

WSPA (World Society for Animal Protection) representative to evacuated of livestocks at the Sinabung vulcano eruption in Karonese district North Sumatra,Indonesia.

Contact confirmation Steven Clegg and Naritsorn Pholperm (StevenClegg@wspa-asiapacific.org &NaritsornPholperm@wspaasiapacific.org)

5. 8/2014 - 12/2014 dan 7/2015 - 9/2015

Work for field work assistant Tien Ming Lee Postdoctoral Research Associate, Program knowledge, Tecnology & environment Woodrow Wilson School of Public & International Affairs 405A Robertson Hall, Princeton University, Princeton, NJ 08544, USA.

Contact confirmation Tien Ming Lee (tienminglee@gmail.com)

6. 2015

Success founded Nias Hill Myna in the wild that already long time arround 20 years not found in south of Nias island (Dymond 1994)

8. Photo documentation of activities ISCP

a. Doc for Mollucan iron wood research

b. Entomophagy activities

c. Children education

d. Poksai program (Garrulax bicolor)

e. "football for conservation"

f. Nias Hill Myna Survey

g. Dokumentasi photo TBCC (Tropical Biodiversity Conservation Program)
