

## Project Report for August to October 2018

### Help Tejaswini & Bhavani Get **AB + Blood** - Their Lifeline...

A mother of a 5 year old and 2 year old girls calls the blood bank at regular intervals. Her ask is "a unit of AB +ve blood for each of her daughters". With both the daughters requiring AB +ve blood for transfusion every 3 weeks she has to put in double the efforts for getting blood. With this, she is constantly under stress.

Only she knows how difficult it is to get blood on a regular basis, month after month since more than 5 years now. The blood transfused brings a smile on the face of the parents and the child.
