University
of Koinadugu

Learning for today
and tomorrow

VISION

Higher education is one of the most effective ways for people improve their lives and the lives of their families. However, a university education is not always accessible to everyone.

In the Koinadugu District of Sierra Leone, students who wish to attend a university face many hurdles. Attending a university often requires people to move to one of the country's larger cities, where students can face heightened living costs in addition to having to pay for tuition.

Project 1808 wants to remove these barriers to higher education by creating an institute of higher learning in Kabala, Koinadugu, Sierra Leone.

We hope that by bringing the university to the community we will be able to work with small cohorts of students to guarantee an affordable education that includes skills training, internships with local organizations, and community volunteer work.

As the university grows, we see Koinadugu District being transformed into a hub for education, research, innovation, and entrepreneurship, improving the local economy and the livelihood of community members.

CORE PROGRAMS

Project 1808's university will have a unique curriculum shaped by community needs and local employment opportunities.

One Health

Our health curriculum will feature a holistic approach to individual and community health. With classes in community, environmental, and animal health as well as courses in epidemiology the curriculum will prepare students for careers in a variety of health-related fields.

Agriculture and Environment

Koinadugu is known as the "Bread Basket" of Sierra Leone with an fertile land and an ideal climate for agriculture. Our agriculture and environment curriculum will focus on implementing innovative agricultural techniques while maintaining traditional practices, which will always be taught with the health of the community and environment in mind.

Science and Engineering

With an introduction to basic scientific methods and advanced courses in biology, chemistry, toxicology, etc. We will utilize partnerships with other universities to offer a long list of courses taught online and in-person by some of the worlds most prominent scientists.

Entrepreneurship

Koinadugu has been blessed with an abundance of natural resources. Our entrepreneurship courses will enable students with the skills to build a profitable and sustainable business from beginning to end.
