

- To consider challenges faced by vulnerable women and those living and affected with HIV, implement projects that would create an environment that does not restrain their potential.
- Train the women to start small scale projects, then teach them how to move to bigger enterprises.
- To educate the community through engaging vulnerable women and those living and affected with HIV to start small income generating projects together, so that the community will embrace vulnerable women and those living and affected with HIV. Thus increasing their confidence, social interaction and inclusion.
- Introduce projects that are short term so that they quickly realize profits to earn a living e.g. poultry and horticulture projects.
- Provide project inputs as loans.
- Constant training and monitoring on all our projects.
- Assist the women with sourcing out market for their produce.
- Funding will continue to be a REVOLVING FUND so that we will be able to assist more women who are vulnerable and those living and affected with HIV.
- The profits will be used to improve the women's livelihoods, their children, extended family members, as well as providing for their basic needs of life.

### Desired end result/ Overall objectives of the project

- To see women beneficiaries being able to run projects by themselves through sustainable funded projects.
- To see women who are vulnerable and those living and affected with HIV having equal opportunities with their counterparts and their children receiving the same treatment with the others in the society.
- A community where vulnerable women and those living and affected with HIV, live a confident and a self-reliant life.

# SANNING FOUNDATION

EMPOWERING WOMEN THROUGH SUSTAINABLE  
INCOME GENERATING PROJECTS.

## Introduction to Organization Executive Summary

Sanning Foundation (SFT) was formed with the purpose of providing social and financial solutions to the poor women in both rural and urban areas of Zimbabwe. Sanning Foundation has already started horticulture and poultry projects in Svosve District and Chitungwiza respectively which help vulnerable women and those living and affected with HIV to start small income generating projects.

- Poultry projects at household level e.g broilers , layers etc.

- Horticulture projects are mainly growing broccoli , lettuce, cauliflower etc, respectively. The project started with twelve women in January 2013 as an initiative, since then the group has managed to grow to 58 women. For the past 2 years, Sanning Foundation has been mainly offering mentorship, training , technical support as well as finance to these women to start up income generating projects.

### Beneficiaries

The intended beneficiaries of this project are vulnerable women and those living and affected with HIV. We intend to make each funding for every woman beneficiary benefit at least 5 members per each household.

### VISION

To impart knowledge and skills to vulnerable women and those living and affected with HIV to become self - sustainable through funded projects.

### MISSION

To empower vulnerable women and those living and affected with HIV with sustainable income generating projects.

### Organisation Goals

- To provide women with startup inputs as resources to start income generating projects.
- To capacitate women through skills training so that they can grow their businesses to greater heights.
- To develop a network of small scale women entrepreneurs so that they can assist one another to succeed.

## How does our project align with the international Women Empowerment Program goals?

- We assist women on how to start income generating projects.
- We assist women with trainings on entrepreneurship and basic financial accounting so that they can properly manage their income generating projects.
- We assist women on how to start and maintain their income generating projects.

Our Organisation's Decision on this activity design. Thus as Sanning Foundation we intend to continue to recognise and assist such affected women in the community as those vulnerable , living and affected with HIV. We want them to realize their full physical and mental potential in order for them to be self- reliant so as to participate fully in the national economy and to be able to earn a living and pursue their vision .

## 2. Program Methods and Design Our Approach

- ? Identify vulnerable women and those living and affected with HIV in order for them to start small income generating projects.
