

# 7 EFFECTIVE WAYS 400 YOUNG LEADERS making a permanent, more abundant, culture in Bolivia

[DONATE](#)

Current situation

Solutions include (see below)

## DROUGHT

## WATER HARVESTING

Mitigated

2016: 80% crop failure and many lost months of productivity has families struggling economically.

Water managed naturally by following the earth's contours. Mulching, food forests and zone planning for life efficiency.

## BOUGHT IN CHEMICALS

## BUILDING UP LIFE

Unnecessary

aged

Unwanted life forms killed with harmful and often unsafe chemicals

Bio-diverse planting in association, composting, worm farms, organic pest repellent, beneficial insects...

## OVERGRAZING

## INTEGRATING ANIMALS

Managed

Deforested mountains, high erosion and extremely dry.

Chicken / duck tractors, hydroponic fodder, controlled grazing, vertical farming.
