Financial Utilization Report

Financial Disbursement

The money generated through GG donations has been bringing great outcome for PD beneficiaries. Since the symptoms of the disease are permanent, constant drug use and physical exercise is not an option for Parkinson patients. A total of 40 Parkinson Patients received the amount. Out of these, 18 are female and 22 are male. USD **1,021.28** was distributed on November 22/2017.

We greatly appreciate GG Foundation & the donor for this support. This patient said, only God knows where we would have been without this support

Walking Stick Delivery

PD drugs and distributed 19 Walking sticks so that they could be able to walk in the walk of life. The stick improved stability while keeping balance during walking. This improved walking practice for and confidence for one of PPSO-E beneficiaries.

Let us hear from Mr. Getachew Tsegaye mouth what the walking stick delivered improved in his life.

I was full of fear due to balance keeping problem while walking. Walking was a challenge for me as if I am supposed to climb the tallest mountain in the world. But thanks to GG donations that made life easier for PD patients. In my understanding there is no small donation as long as it addressed the needs of people affected by PD. It is the heart, not the amount that creates true change.

LET US FIGHT PARKINSON WITH HOPE!!
