

“Oasis” Project

Moctezuma Children's Hospital
Mexico City

Goal

- To create a complementary ludic and relaxing space within the Moctezuma Pediatric Hospital that can be enjoyed by patients, families, and collaborators as a with different areas designed for different purposes.

Model

Project Oasis seeks to accommodate different purposes within a multi-purpose space, based on techniques of hospital psychology:

- **Recreation:** Children's playground.
- **Consultation:** Space of psychological attention and / or communication of doctors with relatives.
- **Playroom:** Module for psychoeducational games, entertainment and mini-library for patients.
- **Area for special events:** For shows and recreational activities within the area.
- **Grotto of the Virgin:** Small shrine
