

### Our Mission:-

The mission of the Primary Education Project is to provide sustainable, quality education, especially for girls, without discrimination, in un-reached marginalized communities, developing the skills of teachers and creating a network of effective leaders through wide - ranging training programs.

The Primary Education Project (PEP) is a part of the education work of Diocese of Hyderabad. And has supported 77 communities in four districts of rural Sindh to open a school in their village.

**Our Schools** A trained teacher from the community provides multi - grade teaching using interactive learning resources that encourage a positive educational environment for students.

### Initial Teacher Educational Programme (ITEP)

The ITEP is an important part of the project and focuses on developing the skills of teachers to teach students effectively in the classroom and become change agents for their communities.

### Our Programme

In addition to the government subjects PEP has designed a supplementary curriculum for the personal growth of students and communities. The Supplementary Curriculum Involves:

#### Disaster Risk Reduction (DRR)

#### Community Led Total Sanitation (CLTS)

#### Social & Financial Education (Aflatoun)

#### Peace Education

### PEP Supporting Girls Education

PEP also focuses on girls' education as only 20% of girls are literate in rural areas of Sindh.

Through the Women's Empowerment Programme PEP encourages women to send their children and especially daughters to school. PEP empowers women to become change agents themselves and participate in the growth of their community.

### Innovation

Learning through a tablet!  
PEP started a pilot project in 2015 to integrate E-learning through Android Tablets in the school curriculum.

## Testimony of a PEP student

**Sangeeta**

Sangeeta is one of our brilliant students studying in a PEP school who is determined to complete her education and support her community as an advocate. Her parents are very proud of her and happy to have invested in her education. They have two daughters and say they are their treasure although belonging to a nation where due to traditional cultural norms, it is a struggle for girls to receive a quality education.

Watch Sangeeta's video on vimeo!
