

Education focused on employment  
and human development

Student's name: María Camila  
Group: 31

**Despite the pandemic, what is it you enjoy the most about being a student at the Pablo Tobón Uribe Education Institute?**

The knowledge our teachers offer us despite the difficulties we've all been having; they have helped us in different ways to make sure that we fully understand all subjects and topics. I love this profession and I've seen how the Institute has made everything possible to never leave us on our own. Besides, this has been a new experience that has taught me to never let the adversities bring me down and to keep moving forward, fighting for what motivates me.

**What is it that motivates you to remain in this nursing assistance program offered by the Pablo Tobón Uribe Education Institute?**

My family, most of all, but also my dreams and the great opportunities the Institute has given me. I want to give the best of me because I don't want to betray the trust everyone in the Institute has put in me.
