What has it meant to you and your family to have the support of the Pablo Tobón Uribe Education Institute?

It has meant everything because thanks to the scholarship and the learning contract I have been able to carry out my studies at the Pablo Tobón Uribe Education Institute. This has been one of the best things in my life so far, because thanks to this program I have the opportunity to work and, in the future, have access to professional education and achieve economic stability for my family.

How do you imagine your future as a nurse?

I imagine myself working at Hospital Pablo Tobón Uribe as a nursing assistant, providing safe and high-quality care to patients based on the knowledge acquired during my training process; and, later on, having access to professional education and ensuring economic stability to help my family.
