31

What has the Institute's support for your education meant to you and your family?

For my family, the Institute has represented a major source of support that has had a positive impact on everyone. We are deeply grateful to the Institute because it has enabled me to grow as a person and it has also given me all the necessary tools for performing well in the work environment.

How do you envision your future in the nursing field?

With the knowledge and good habits that I have learned from the teachers and the director of the Institute, I feel confident about, and have the privilege of, saying that I would be a very good addition to any hospital that requests my services.
