

# **LEADING CHANGE UGANDA**

## **SMILE OF A CHILD**

### **PROJECT BRIEF**

31 May 2017

#### **FAMILY**

Smile of a Child is a community-run project. Through house visits, parents' meetings, counselling and supporting parents and guardians, we gain their trust. We do not take enrolled children out of their families or local environment. We believe that we can have a bigger impact on our children's life by developing their potential within their own culture and family. Involving parents means we do house visits on a monthly basis. We discuss the children, possible issues with their education, their family situation and any health issues. It's important to us to have a close relationship with the parents. As Ugandans ourselves, we are familiar with their background so we can provide them with the support they need. We host regular parent meetings at which we inform them about the project and their children's achievements.

This project will provide at least 30 mothers with training in business skills, after which they will be in a much better position to take advantage of economic opportunities. By training mothers, we are creating a sustainable system of self-improvement so that these women can pull themselves, and their children, out of poverty. A successful outcome will help us to provide these skills and needs to other communities.

#### **EDUCATION**

Education is key to self-empowerment, which we believe is necessary to sustainably lift children out of poverty. This project searches for opportunities which can lead to greater educational attainment for the Buwaali children. We develop partnerships with individuals and organisations that are willing to provide an education to an orphan or underprivileged child. One such partnership is with the Hope Nursery and Primary School in Buwaali (see below). We assist the children with homework and do extracurricular activities of an educational nature so the children learn in a playful way.

#### **FOOD**

A hungry child cannot learn. Therefore, one of the priorities of this project is to ensure that the children in Buwaali village do not suffer from hunger. The project contributes to a daily warm meal to guarantee that the children are fed every school day.

#### **CARE**

Through the Community Reading club, the children are involved in a number of activities. They are taught how to read and write, and further develop their mind through arts and crafts, to let them develop their abilities, creativity and self-esteem. This is also an opportunity for the children who cannot afford to go school to learn how to read, write and speak English as well as their local languages. We are aware that education and food itself are not enough to help a child find a way out of poverty. We believe he or she must be empowered and develop self-confidence. We offer the children activities such as arts and crafts, music drama, dance and sports. We prepare workshops on topics such as HIV/AIDS, sexual education, violence, finance and consumerism, environment and health, along with discussions of their hopes and dreams. These activities provide an atmosphere in which the children discover their talents and themselves.

#### **REQUIREMENTS**

- School fees
- School uniforms and other clothes
- Textbooks
- School shoes
- Food

- School stationery
- Medical items
- School bags

## **PARTNERSHIPS**

1. Hope Nursery and Primary School, Buwaali

This is the only private school in the community and has the best education compared to the nearby government school. The nearest government school is 10km from the community, which is a very long distance for any child to walk every morning and evening. Hope Nursery and Primary School is owned by Mr. Lubega, the community pastor in this village of Namulonge – Buwaali.

## **DURATION**

The project aims to cover all three terms, where the children stay in school for four months each term;

1. First Term
2. Second Term
3. Third Term

## **ESTIMATED COST PER TERM**

Each child pays 30 pounds per term (see further our budget).

## **POTENTIAL CHALLENGES**

Through our current work in Buwaali Village, we recognise the following challenges:

- HIV/Aids and other diseases
- Death of family, friends or parents
- Poverty and lack of hygiene
- Hunger
- Teenage pregnancy
- Lack of education
- Sexual abuse
- Problems with friends and family
- Problems with parent or foster parent involvement
- Lack of basic needs such as food, school uniforms, school fees, school books, winter clothes etc.

Notwithstanding the above, we were successful in assisting 35 children through our Smile of a Child Project in 2016. We discovered that through good teamwork, and through developing partnerships with families and the local community, we can overcome many of these challenges.

Our team have the following traits, which we strongly believe will lead us to success in this endeavour:

- Staff can communicate in the various local languages with the families
- High levels commitment and passion for the project
- Knowledge of the local environment and familiarisation with the various challenges facing these children
- Good care of the entrusted children
- Cultural empathy for Ugandan traditions
- Cooperation with other volunteers
- Acceptance for the foreign life and culture
- Thoughtfulness for the family where you live
- Understanding of family traditions and rules.

## BUDGET

<b>LEADING CHANGE UGANDA</b>				
<b>SMILE OF A CHILD IN BUWAALI VILLAGE PROJECT</b>				
	<b>Notes and calculations</b>	<b>Unit</b>	<b>Unit Cost</b>	<b>Budget</b>
