Newsflash June 14th, 2017

Flash items:

1. High first crop yield, Kapri visits project area.
2. First SFG ambassador started.
3. First project expansion 20—> 50 farmers.
4. On the way to 50 Hectare: help wanted!
5. New fundraising campaign started.

1. High crop yield, Kapri visits project area.

Your donations facilitated us to buy seeds, fertilizers and other tools to harvest **60-80% higher crop yield** on the 10 Hectares maize area. Recently, Kapri Turay visited the rural families: They showed their gratitude, because they harvested more staple foods and so are able to generate a higher income through the project. **All "Seeds loans" have been repaid** and an exchanded group of farmers have already begun next seasons project, in march 2017.

2. First SFG ambassador started.

"My name is Peter Faling, project manager at ONVZ, a health-insurance company in Houten (NL). When showing my interest in the "Seeds"concept, Ben asked me to become an ambassador of Seeds for Growth. Of course, I confirmed directly, to

be able to support this unique charity concept more actively. anuary 2017, I presented this wonderful project to my colleagues of the IT department. Many people were enthusiastic and took the available documentation home. Next step is to further promote the project within ONVZ and to a broader audience outside the company"

3. First project expansion, 20 —> 50 farmers.

Due to the support of several major donations in December of 2016, the project was expanded from 20 farmers at 10 Hectare to **50 farmers at 25 Hectare** in March 2017. Due to the dry season, maize is raised on heaps in swamp areas now. *See photo below.*

May, 2017:

Momodu S. Kamara inspecting new corn field

4. On the way to 50 Hectare, help wanted!

Since we started in June 2016, lots of work has been done; the first harvest, project expansion to 25 ha and interest from the Siera Leonean government. Further growth is difficult without reinforcement of people who help us volunteering with newsletters, communication, campaigns, manage new website, finance, and more... Interested? "Sharing wealth to harvest a peaceful and a sustainable society"

Seeds for Growth

Supports rural farmers and their family
towards better livelihood in Malal-Mara

Sierra Leone

5. New fundraising campaign started...

As you may know, all donations are invested as a revolving fund to improve the livelihoods of rural farmer families in Sierra Leone. Every Euro will be invested in seeds and auxiliaries and we provide vocational training to enhance the necessary capabilities of the participating farmers. After harvesting, farmers will repay the "seed" loan to the Foundation, and a new cultivation period can be supported. By implementing this concept a farmer can work structurally for a better income and living. We are supporting the farmer families to develop themselves.

For expanding in September to 100 farmers (50 Hectares), extra **"seeds"** are needed: EUR/USD 125,= per farmer.

Therefore, since June 12th, we joined GlobalGiving and now we are participating and learning during the "accelerator" funding campaign, to raise about EUR/USD 6,250 before the end of June 2017. Please help us....
