basic infrastructure

In April 2015 Hoedspruiter Kim Scott donated a bakkie full of toys to numerous underprivileged creches in Acornhoek. Upon seeing the condition of these creches, Kim and her friend Mimmy decided to rise to the challenge of improving conditions at local creches by providing resources, hygiene and infrastructure.

July 2015:  
**RISE Foundation**  
was born.

# NOURISH

## Rise

# OUTREACH

**RISE ECD Outreach** falls under the Education pillar of **NOURISH's 5 Pillars** Approach to upliftment.

Our projects center around **Education, Conservation, Tourism, Sustainable Farming & Economic Empowerment** with a goal of growing resilient communities.

In November 2016 **RISE Foundation** merged with **NOURISH**. Since then, Nourish has played an active role in the RISE Early Childhood Development Outreach. Our work focused initially on new infrastructure in the form of an outside classroom, toilet blocks and recycled playground for **Boikhotso** creche.

Nourish RISE ECD Outreach now provides support to 7 partner creches. This includes the Nourish creche (funded by Izingane Foundation & Mr. Halicci in October 2016). We provide ECD teacher training, food security gardens, recycled playgrounds and handmade educational resources for developmental play. This training supports nutrition and important childhood learning.
