

# KANISHKA

## TRANSFORMATION OF A LIFE

### BEFORE:

Kanishka is born with multiple congenital issues including one kidney, Laryngomalacia, Ectopic Anus, and curved spine. As a baby she was prone to frequent urinary infections, colds, and lung infections. Her breathing would get obstructed which would lead to wheezing. She did not develop stability in the neck even at 6 months. Overall she has delayed

development. She was often hospitalised. Doctors didn't offer much hope for her healthy growth.

This is when her sessions started with Aashwasan.

### AFTER:

Today, at 4 she rarely gets infections. She walks with support. Kanishka is gaining strength consistently and can be seen in all her activities and exercises. She is able to complete her activities of daily living. She can eat by herself as well. She displays good table manners. Her bed-wetting episodes have reduced drastically, and she expresses go to the toilet very clearly.

Kanishka has started saying her first words. It was an exciting moment for her mother when Kanishka first uttered 'Amma'. She has started to go to school and is extremely enthusiastic to learn. Her gestures, expressions and ways of interacting are unique and she steals everyone's heart.

**There are many like Kanishka who  
have untreatable conditions.  
Aashwasan services can transform  
their life and bring hope in  
inexplicable ways ...**

**YOU CAN HELP...**
