

A Proposed Bill

Pro Viability Choice

Angels In Waiting's Pro Viability Choice

ISSUE

A total of 652,639 abortions were reported to CDC for 2014. 1.3% of these aborted babies were 24 weeks gestational age or greater, and most were viable fetuses with the aid of medical help.

EXISTING LAW

The Supreme Court would not define viability because they said the point of viability varies. The court ruled; viability could only be determined case-by-case and by the woman's doctor. Currently, the same doctor getting funds to perform the abortion is determining if the baby is viable.

THIS BILL

With this law and your help, we can help save **50,203+ little souls**. Our charitable foundation consist of Sammy Conforti a 24 week surviving neonate, and neonatal intensive care nurse providers are about to embark upon a new and controversial project.

Angels In Waiting's Pro-Viability-Choice Bill:

Life, Liberty and the pursuit of Happiness, is a famous phrase in the United States Declaration of Independence and is the bedrock of our American values. We American's hold these truths to be sacred and indisputable; that all men are created equal and independent.

We American's derive rights inherent and inalienable, among which are the preservation of a viable life. We believe viable premature infants of 24 weeks gestational age and higher should also have these inherent rights, and we want to amend our Federal and State laws, which permit a woman to terminate her 24+ week pregnancy and the life of her viable fetus.

Our goal is to amend the current laws and implement a program that provides a woman a **"choice"** not terminate the life of her viable fetus. Our mission is to add a **third choice**, an option that allows a woman to terminate her pregnancy, but not terminate the life of her viable infant. A **"Women's-Choice"** to keep her viable infant alive, but not raise it.

Our charity of neo-natal ICU nurses would also like to amend the ruling of the physician slated to abort the mid to late-term fetus determines its viability. Intern we would like to modify this ruling and request a third non-bias physician to also determine the gestational age and viability of the neonate, via an ultrasound via a linked-telemedicine portal.

AIW's charity of nurses has been successful in the past, passing State Law Chapter # 490 Please review our last bill:

SUMMARY

As neonatal intensive care nurses, we have seen first-hand the capability of providing viable 24 week *"wanted"* preemies; Life, Liberty, the pursuit of Happiness, and doing so through the hearts and hands of dedicated nurses, and then on to their forever families. We realize this is diverging and controversial bill and we nurses need your unwavering support to make this project come to life.
