OPD No. : 13842

Name: Asif (Name change)

Age: 1 year

Gender: Male

Centre: Guwahati Comprehensive Cleft Care Centre.

Asif is a baby boy, born on 9 May 2017 at Sausuria Nursing Home Nagaon with a facial deformity of cleft lip and cleft palate. At the time of his birth he was diagnosed with jaundice and kept in ICU for 3 days and on the 3rd day the baby Doctor brought a video of his son and shown to baby's mother because she was unable to walk due to caesarian. When mother saw the baby's video clip her eyes were filled with tears and she cried and felt very sad, Baby Doctor gave her sympathy and told them that this kind of cases are happening day by day so this is not a very big problem and this can be cure by surgery very easily. Doctor also advises them that take the baby to GC4 Mission Smile and get the proper treatment at free of cost.

Village people said bad things about the baby, mother herself thought that due to purnima grahan the baby was born with facial deformity but some good educated person told them its due to vitamin deficiency baby was born like that but no need to worry its treatment is possible.

Amir is right now living with her mother Parbin Sultana 26 year old Anganwadi worker earns 1500 Rupees in a month and father Md. Sakuruddin 33 years old society worker earns 3000 rupees monthly and a elder brother at the village Somoka, P.O Tuktuki, P.S Bordua and Distict Nagaon.
