

Dear Donor, the demolition started!

On March 4th, 2019, the demolition started. We have the architectural plans in order to get the building permissions. We have our architects and engineers working hard so that our Community Center which is located in the slum areas of Gustavo A. Madero in Mexico is totally renovated next year. We considered elderly people deserve a dining room with all the comfort and other inclusion community activities into the center so that they feel that belong to a big family.

Once the building is open we will equip each area and especially with your donation we will equip and furnish the community kitchen and dining room were we will provide with 12000 meals for elderly people a year.

You have made this possible and want to share with you and thank you!!
