

**Dear Donor, we keep working!**

We keep working so hard in our Community Center which is located in the slum areas of Gustavo A. Madero in Mexico City. In this report, we want to show you the renders of our new Community Center that will soon begin to be built. With these new facilities we can offer our services with better quality.

You have made this possible and want to share with you and thank you!!

Once the building is open we will equip each area and especially with your donation we will equip and furnish the community kitchen and dining room were we will provide with 12000 meals for elderly people a year.

We considered elderly people deserve a dining room with all the comfort and other inclusion community activities into the center so that they feel that belong to a big family.

Thank you!
