

Project Funding Plan

Our Campaign is unique, it addresses the real insurmountable barrier of trade finance, instead of spending this AID we are going to recycle it over and over again. It is used as a float to import small specialist delivery vehicles that can then be financed, this allows us to assist 64 single mothers 4 times per year. 256 per year for 20 years is 5,120 mothers from the one donation.

As such the AID that is derived from this campaign is never spent, it is used to provide trade finance over and over again in perpetuity. All funds are managed and disbursed as per Government regulations.

More information about the structure and objectives of the project is available at: <http://innocourier.com/about-us>
