Dear member,

RE: COVERING LETTER

This Kole Intellectual Forum's documents; serves to inform you that: the organization was formed to promote quality education that is sustainable of children at post conflict area of Northern Uganda; meaning that: they will succeed in this struggle by addressing it through three main objectives; 1) by integrating the community that had been disintegrated community from their schools; 2) by engaging them into ginger growing and exportation; and 3) by procuring ginger processing machine.

Thank you

Obua George  
Director Kole Intellectual Forum

## Concept Note

<b>Registration</b>	Is a Community Based-Organization registered in Kole District, Northern Uganda Year of formation: 2014, Year of registration: 2016, Registration Number: KDLG/2016/038

### Project summary

Kole Intellectual Forum intends to rescue a thousands of post-war children of Northern Uganda in education crisis; by promoting sustainable quality education for all children within the region at all levels; but first, beginning with, the 3000 pupils at Apedi and Angic Primary Schools in Kole district; through, community Integration Program; and, by engaging their parents/guardians into viable livelihood projects; at an estimated cost of \$463,180.88; an equivalent of Uganda shillings (1,574,815,000=);

### Background

Northern Uganda is areas of Uganda; whose occupants, are characterized people who generally hard working; and that: they are, energetically very strong both: physically and mentally. Considering that, when British colonized them, from around 1950s to early 1960s; they banked on their physical fitness, to introduced to them; a crop: cotton, that they felt, would be best manage them than others; other population of the other parts of the country were introduced to simple to manage crops; for instance: Coffee and bananas were given to those in the entire East, through central to western; tea and groundnuts were given to east and western; etcetera; moreover, when we talk of their mental abilities, the region has produced prominent people in all sectors within the country; politically, the first President that led the country to independent: Dr Apollo Milton Obote was the indigenous son of the land, Okello Field Marshal that took over the political power of Zanzibar in Tanzania in the mid 1960s; with arrows and bows, was also a born of Northern Uganda; including Field Marshal Idi Amin Dada; were all the product of the region; generally speaking, the region is that place, that has produced 3 presidents out the eight presidents that the country has ever produced since independent (1962); although, they were seen as being energetically capable and mentally tuned; it is not surprising to notice that: the region has been faced with a number of challenges; the worst of it all, was the political turmoil that engulfed the region for close to three decades; leading to collapse in almost all the sectors; with education showing the poorest indication; because of that: the members of Kole Intellectual Forum, got convinced that: there is an urgent need for them, to jump in and join the rest of development partners, in rebuilding and reconstructing the region; after decades of civil, without clear answer.

Kole Intellectual Forum, therefore, through it professional members; has developed a program; call Community Integration, that is meant, to integrate the community of the region; that had been disintegrated from their schools during the war; and, because of that: the organization is planning to ensure that, besides integrating the community, the parents/guardians of these should also be engaged into ginger growing and exportation.

### Problem Statement

That: pupils in government aided primary schools of Northern Uganda, that are hosting children of the common man, are performing poorly; because, their community had been disintegrated from their schools, during the 30 years of civil war, that left the region dilapidated without any clear answer; although, different development partners: including, government of Uganda and other nongovernmental organizations, have tried to develop programs and implemented; children in these schools are still with a long way to go; including, Apedi and Angic primary schools where Kole Intellectual Forum is operating.

Kole intellectual Forum therefore intends to improve on quality a education of a thousand children of Northern Uganda; but first beginning with, Apedi and Angic primary schools, Kole District, Northern Uganda; through, Community Integration Program; and, ginger growing and exportation.

## **Main objective project**

- To promote sustainable quality a education for all the children in Northern Uganda at all levels; through, community integration and viable livelihood projects,

## **Specific objectives**

- To integrate the disintegrated community to the schools
- To engage the integrated community to schools in ginger growing and exportation; and,
- To procure ginger processing machine to process ginger produce by the integrated community to schools.

## **Significance**

Firstly, because of the program, the Relationships between the surrounding community and the school community will be improved; creating a conducive learning atmosphere for all the stakeholders in education; more specially to the pupils.

Meanwhile, on the other hand, if the communities are integrated, to the schools, and engage into ginger growing; they will, generate reasonable amount of income; through, ginger growing and exportation. This reasonable amount of income will enable them to promote quality a education that will be sustainable; leading to general development of this post war area and beyond;

The community integrated to schools, school community, children and the world; will benefit from the procurement of ginger processing machine by Kole Intellectual Forum; because, the ginger processing machine will prepare the ginger harvested to the standard that will be accepted in the world market. It will also generate reasonable income that will make the parents of the children to meet their obligations and pay school fees for their children; the children and the school communities will live at peace because the school requirements will be meet; above all, the country will benefit because through export the will generate some revenue; and internationally, the organization will increase the international food basket.

## **Market research**

According to the findings of Kole Intellectual Forum, the potential clients of community integration program; in Northern Uganda alone, are close to about 17,000,000 people; these communities if they are integrated to schools, they are potential customers to produce ginger as well as, exporting it. Meanwhile, for the case of buyers, Kole Intellectual Forum is a registered member of Uganda Export promotion Board; Government institution whose duty to outsource for its members market opportunities from other countries; attached are export Bulletin of July and August. This opportunities, explains our ginger is demanded in very many county.

## **Location**

Kole Intellectual Forum head office is located at Te-Okole village, Ogwangacuma Parish, Aboke Sub-County, Kole District, Northern Uganda; the location of the office was chosen because of ease accessibility; in terms of road network, social amenities, security and economic viability. Hence, because of these: Kole Intellectual Forum is able to perform all its functions cost effectively.

## **Justification**

...because, according to NPHC-Main Report (2014) that considers education; as, one of the ways, one can judge the society's stock of human capital and level of socioeconomic development; it is, therefore, important to ensure we promote quality a education that is sustainable; by using a method that engages the community to education and viable projects.

## **Budget**

To accomplish this, Kole intellectual forum has drawn up a reasonable budget of \$463,180.88; an equivalent of Uganda shillings (1,574,815,000=); details are as per attach budget template below.

## **Conclusion**

Kole Intellectual Forum therefore, intends to rescue a thousands of post-war children of Northern Uganda in education crisis; by promoting sustainable quality a education for all children at all levels; but first, beginning with, in this project, the 3000 pupils at Apedi and Angic Primary Schools in Kole district; through, community Integration Program; and, by engaging their ginger growing and exportation.

**PLAN ACTIVITIES AND AN ESTIMATED BUDGET OF KOLE INTELLECTUAL FORUM; TO RESCUE 3000 PUPILS, AT APEDI AND ANGIC PRIMARY SCHOOLS, FROM EDUCATION CRISIS: FROM  
JANUARY 1<sup>ST</sup> TO DECEMBER 31<sup>ST</sup>, 2018**

**AT POST CONFLICT SITUATION OF KOLE DISTRICT, NORTHERN UGANDA.**
