

Rehabilitation Center for the CTO warriors (Ukraine) in Latvia

(about us)

**In this document, we will propose a model for organizing the activity
of the rehabilitation center for veterans of CTO (Ukraine)
in the territory of the Republic of Latvia
(at a later date under the name as "CENTER")**

As we all know, Republic of Latvia has been successfully defeated the consequences of the Soviet occupation for 25 years. And from early days we provide all possible support to the people of Ukraine on the difficult path to the European dream.

Also, Latvia, traditionally, famous for its ecology, quality food, good-quality medicine and enjoyable sea climate.

We believe that staying the CTO members in the rehabilitation center, organized here, will allow people not only to restore and strengthen their physical health, but also personally see the result of the changes that Latvia has implemented over the past 25 years. Perhaps the knowledge and experience will be useful guests of the rehabilitation center for the success civilian life in Ukraine.

This presentation text
of the official website of our public organization
<http://www.latvia-renaissance.foundation>

Is designed to attract the attention of persons and organizations -
potential partners to our new project! Which we realize are carrying
together with the "Congress of Ukrainians" in Latvia.

Here we want to expand and deepen these theses so that it is clear how
exactly we get to make it.

Currently, in the territory of Ukraine, according to the estimates of various expert communities, there are more than 21,000 people who took part in hostilities in the east of Ukraine - defending their homeland from the invasion of Russian aggressors.

This figure we give here to show everyone the relevance of the work of the rehabilitation center for veterans of CTO for many years.

Modern social sciences confirm our position: along the restoration of physical health, for people who took part in hostilities, their psychological rehabilitation and their finding a worthy place in a new, "post-mortem" world is required.

Sociological research confirms an important idea: it is impossible to completely and completely throw out the war from the memory of a person, life for each participant in military operations is divided into "before" and "after" the war

(that is why the civilized countries try in every possible way to avoid mass military conflicts, however, because of military aggression by the "third world" countries, such conflicts are now inevitable).

In the world of the future, probably, civilized countries will reflect such aggression with the help of combat robots and other "live machines where the integral breathes," as the poet Alexander Blok prophetically wrote, but now heroes defending the civilized world need to know for sure that their Feat will not be forgotten and society will always appreciate to them.

Particular attention should be paid to the soldiers who received a negative experience of being Captured by enemy. Unfortunately, this negative experience multiplies the already strong negative emotions of participants in any fighting and in the absence of proper rehabilitation it can become a serious psychological injury that will not allow a person to return to full-fledged peaceful life. We and our partners suggest this category of people among the priority guests of our rehabilitation center.

However, we got carried away with the "reorganization" of the world, let's talk about specific assistance that will be provided to CTO veterans in our rehabilitation center ...

On the frequently asked question to us: why the rehabilitation center is planned to be located exactly in Latvia, we, in part, have already answered. Let me give a few more arguments:

1. It is not a secret that one of the motive power of Ukrainian people and the personal participation of patriots in military operations in the east of Ukraine is the desire of these people to be together with their country in the United Europe, to become an integral part of the European family, to perceive and follow the European Principles and values that are basic to the civilized world. Unfortunately, this is not understood in modern Europe by all, nostalgic for the mythical "greatness of the past" and perceiving the militaristic sting of the television propaganda by Russian side. Thus, the stay of CTO veterans in Latvia will allow them not only to restore their health, rest, gain strength and energy for further peaceful accomplishments, but also, through "immersing themselves in the environment", communicating with people, participating in seminars with specially invited instructors, To see and appreciate all the positive changes that the Republic of Latvia carried out in the way of overcoming the consequences of the Soviet occupation and which Ukraine is currently pursuing;

2. The rehabilitation center will be located in a comfortable hotel-type building on the seashore of the Vidzeme region in Latvia, 70 kilometers from Riga. This ecologically clean place has been famous since ancient times for its beauty and mild sea climate. In fact - stay in the Center, this is a full-fledged holiday in the seaside resort at any time of the year: in summer - sea bathing and sports games on the beach, in winter - skis, sleds and other winter sports, at any time of the year - Pensive walks along the seashore and In a pine forest. In the nearest reservoirs it is possible to fish year round;

3. Medical services are supposed to be carried out in the clinic of the Adazh district. This modern medical facility is located near the rehabilitation center and is equipped with modern medical equipment. The medical staff of the clinic will provide comprehensive assistance to the guests of the rehabilitation center;

4. Latvia is famous for ecologically clean food products. Guests of the rehabilitation center will be offered a full board. The diet will be made up of Latvian products, which will maintain the optimal balance of delicious and healthy food.

The program of stay of visitors in the center amount
21 days.

During the stay guests will be offered a rich program:

- complex of medical measures;
- a cycle of lessons on psychological rehabilitation;
- educational cycle;
- organized leisure (sports and cultural);
- excursions to cultural and historical sites of the Republic of Latvia;
- volunteer participation in the activities of the Latvia Renaissance Foundation.

The main goal of the guests' stay in the rehabilitation center is full and comprehensive comprehension and transformation of their personalities for the subsequent successful and fruitful life in society for the benefit of themselves, their families, their country and the entire civilized world.

It should also be noted that the activities of the center do not pursue commercial goals, all stay of guests in the rehabilitation center for them is absolutely free of charge and is carried out through voluntary donations from individuals and organizations sent to the Latvia Renaissance Foundation with a note in the "payment purpose" column:

"On the activities of the rehabilitation center for veterans of CTO".

**To start
the rehabilitation center
in 2017
we need
250 000 - 300 000
euro.**

**The monthly expenses for the full-fledged activities of the Center
require 12,000 - 15,000 euros**

Later we plan to take in our center - 50 - 70 people per month.

**Subsequently, we plan to "throughput" - up to 50 people
for 21 days!**

**You should know that the center's activities are based on the principles of secular humanism and philanthropy, so we emphatically declare the unacceptability of any forms of differentiation, segregation, humiliation of human dignity and the influence of any totalitarian ideologies. The Center will conduct its activities strictly following the laws of the Republic of Latvia, the spirit of European humanism, the aims and principles of the
Latvia Renaissance Foundation.**

Ladies and Gentlemen!

Let's implement this important international project together, we are open to cooperation, to dialogue and are ready to provide you with additional information about our Center.

Glory to Ukraine! Glory to the heroes!
