

# BACK TO SCHOOL IN IRAQ

INTERMEDIARY REPORT – March 2020

## Great results, new challenges

Thanks to COOPI, in 2019, 3949 children were able to back to school and complete their academic year. Our project to set up temporary classrooms in the villages around Mosul has been successful with a total of 12 new classrooms built and appointed, 53 teachers trained, 23 toilets and 5 water tanks installed. We also have provided sports materials

In the Qayyarah Subdistrict, close to the famous city of Mosul, education was heavily affected during the conflict and the ISIS domination. Learning facilities had a huge share of destruction, and most of the students got displaced because of the hostilities. Text books were burnt by ISIS militants. COOPI, working in collaboration with a local NGO and the local Cluster of the Ministry of Education, provided prefab cabins (containers) transformed into classrooms, textbooks and training for teachers and educators, and schools restarted. All students, both males and females, have now a place to study and prepare themselves for life. Some photos was realized in our schools, have a look here below and enjoy what, thanks to your contribution, it was possible to achieve!

## A new challenge

Now we have a new challenge and we wish you to be on our side again. We want to set up 5 new schools with 28 toilets, train 156 new teachers and headmasters, distribute didactic material to 1000 children and offer psychological support and sport activities to 4000 children in 8 schools in the Qayyara sub-district. More than 5000 children will benefit by this project. We really hope you will join our efforts to provide a proper and safe education to these little “warriors” in their struggle for education.

Furthermore, due to the recent COVID-19 outbreak in Iraq, we are implementing new sensitization activities among local communities and our children in order to stop the coronavirus transmission.
