
Help Breast Cancer Patients Receive Chemotherapy

Port-au-Prince, Haiti - September 9, 2018

Breast Cancer Program

Fig1. This is IHI's chemotherapy room where our breast cancer patients receive their treatment.

Meet Claire-Molie Charles

(These pictures were taken throughout various stages of Claire-Molie's treatment with IHI.)

Our Support Group

While the treatment for breast cancer is an important part, we also focus on bringing awareness on breast cancer through our support group. The support group meetings occur bi-monthly and include our patients along with their peers. The meetings represent a safe space for them and their family members to freely express themselves without judgement. They are able to share their experiences, their stories and adversities faced when dealing with breast cancer in Haiti.
