

IAHV Climate Action Now - Activity + Impact report

Published 20 November 2024, by IAHV Project Team

34,215 Trees since 1.1.24 1,812,729 Trees till date	18,128 days employment created	225, 937 tons of CO2 removed
		

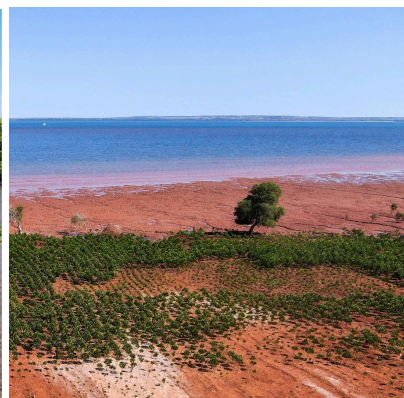

Thank you!

A big "Thank You" to all our donors. Thanks to the generosity of you, our donors, over the last few months, we are able to plant a further 34,215 trees. This will bring the total trees planted to 1,812,729 trees.

You know the value of planting trees: to help stop climate change, to restore nature, to provide paid work to help people out of extreme poverty - and much more! Amongst all the razzmatazz of COP29 in Baku, bringing us all back down to earth was a recent emissions gap report which reveals that current policies are still on track to lead our world to a disastrous 3.1 C of warming by 2100. What's frightening is this is actually worse now in 2024 than it was in 2021!

What to do? Well first to make sure all understand that not enough is being done to stop Global Warming. And secondly to demand action - from Govt, businesses large and small, and from friends and contacts. And that planting more trees is both low cost and helps make a difference.

Some pictures from our Madagascar Reforestation site - Ongoing

Uganda Reforestation site - New

IAHV and SOP partnership has started to work with a community of families in Uganda where they have planted saplings of Jackfruit, Avocado and Mangoes. This site has the potential for significant scaling impact from 2025 onwards. In the next edition of Impact report, we'll share more details and media.

Brazil Reforestation site - New

We are working on behalf of the Guajajara indigenous Community in Arariboia, Brazil: Rob de Laet, Founder of the Future Of The Amazon Foundation and Charles Appleby, Founder of N0CO2 have been working on this potentially new site to to save and restore 413,000 hectares of the Brazil Amazon Rainforest - which is about 1.5 x the area inside the M25 motorway around London! A letter of Intent was signed by the Community in 2022, and their intent confirmed at a meeting on site with our Project Team in July 2024. More on this exciting + massive opportunity for Philanthropy, in 2025.

Volunteers from Forest Guardians – the Community's Protection Team

Our team meeting with key members of the Guajajara Community in July 2024

Intern joins IAHV UK

"I am Sienna and am honoured to be volunteering as an intern with IAHV, working on the climate action now project. I am keen to be part of the green energy transition and this year IAHV has provided me with the opportunity to make a tangible positive impact on this planet and network with people who share similar ambitions." - says Miss Sienna Bassi, who Joined IAHV UK as an Intern in Sept 2024.

In 2025, IAHV would welcome more young people to join as interns working on causes they are passionate about. High potential candidates receive 1-2-1 coaching and mentoring and work towards a clear 13 week or 26 week internship plan.

In the News 1-2-3

World is on Track for 3.1°C Warming

The UN Emissions Gap report warns that without immediate action, global temperatures could rise to 3.1°C, exceeding the Paris Agreement's 1.5°C goal. To remain on track, emissions must be reduced by 42% by 2030 and 57% by 2035, requiring urgent action, especially from G20 nations.

While achieving these targets is technically possible, it requires global mobilisation, massive investments in renewable energy, energy efficiency, and nature conservation. [Read more](#)

Starmer Sets out New 2025 Climate Goal

At COP29 in Baku, UK Prime Minister Keir Starmer committed to reducing emissions by 81% by 2035, aiming to establish the UK as a global leader in clean energy. He highlighted the importance of international collaboration and emphasised that tackling change is key to national and global security.

Starmer also introduced initiatives like £1bn offshore wind contract with Siemens Gamesa, aiming to generate power for nearly 1m homes and create over 1,300 jobs in Humberside. [Read more](#)

UK appoints Rachel Kyte to climate envoy role axed by Sunak

A former climate chief of the World Bank has been appointed to lead the UK's efforts to forge a global coalition on climate action, the Guardian can reveal.

Rachel Kyte, who previously served as special representative for the UN and a vice-president of the World Bank, will take up the role of climate envoy to lead the UK's return to the front ranks of global climate diplomacy. Her role will be vital to the pledge made last week by David Lammy, the foreign secretary, that the UK would play a central role in tackling the climate and nature crises, in contrast with the previous government, whom he described as "climate dinosaurs".

COP29 - UNFCCC Climate Conference in Baku Nov 11-22, 2024

The global conference is a chance for countries to come together and thrash out the international response to rising global temperatures, against a backdrop of record-breaking temperatures, devastating storms, flooding, heatwaves and droughts. The focus is on finance and on emissions at the UN climate summit in Baku, Azerbaijan, this month, but countries are a long way from any kind of consensus. Tense negotiations over funding are expected to dominate the negotiations of parties; also as Africa calls for a tenfold increase in cash.

Shailen Mittal from IAHV Climate Action Now and Mr. Darshak Hathi, IAHV's Global President are representing IAHV, International Art of Living Foundation and SOP in the COP29 Conference Blue Zone. He has been an international delegate in Three of the Four UN COP conferences and is passionate about SDGs and Nature-based carbon removal solutions involving local communities, such as reforestation. He also holds avid interest in Green Finance, decarbonising Trade Supply Chains and is a trained Climate Fresk facilitator, regularly conducting the workshops educating partner communities and corporate professionals about IPCC's Science of Climate Change.

Summer 2024 Campaign : Fly Greener

People love to travel. ❤️ The concern is about CO₂ from flying. Great! Our campaign FLY GREENER helps. Travellers can heal nature, relieve poverty and remove their CO₂. All from the trees we plant for them 🌳

Do you know how far one can fly for 1 Tonne of CO₂? That's 8 hours of travel in Economy? Or 4 hours Return. Or 2 hours Return for 2 people ✈️ We're removing CO₂ emissions from holiday-lovers.

Here's the Campaign Post and full video :

Earth Day 2024 Campaign and Impact so far

Nature Lovers came together to spread the word for a beautiful CAMPAIGN that started on EARTH 🌍 DAY 22 April 2024. Our shared goal is to fundraise for 1 million trees 🌱 🌿 🌳 The Campaign is simple and straightforward - invite friends, family and colleagues to remove 1 tonne of CO₂ — by planting 120 trees per person. Besides protecting and nurturing BIODIVERSITY, it generates jobs for underserved people in Madagascar. 1,750,000 trees planted so far - by NOC02, ROTARY International, Saving Our Planet, IAHV and ART OF LIVING together.

www.iahv.org.uk, www.savingourplanet.net/, <https://n0co2.org/>, www.rotaryinlondon.org/, www.artofliving.org

22 Ambassadors (volunteers) came together to support this campaign and so far net £618 raised that'd plant 3090 new trees removing 26 Tonnes of CO₂ for every year the trees grow.

Supporters and donors are Invited to join Whatsapp group of the community:<https://chat.whatsapp.com/GSG9pMe4w772POvT95t6xj>

End of Report.
