

Dear donor,

We would like to share with you the joy of having an educational tool called ONIdiario. With this tool, we can strengthen the development of nutritional capabilities in the beneficiary families of the populations we serve in the Wixárika Sierra, in the northern part of the state of Jalisco. This tool includes worksheets on topics related to nutrition, human development, and food technologies, which are specific for children, parents, and the family as a whole. We always aim to preserve the customs and traditions while promoting knowledge specific to the Wixárika culture.

This ONIdiario has already been adapted to the Wixárika language, which greatly facilitates the appropriation of its contents. In future reports, we will be able to share some of the results of the application of the Wixárika ONIdiario.

THANK YOU for your trust!!
