

# We have good news!

This is one more step in our mission to support education in Colombia.

**Good news  
has to be  
shared**

We celebrate those who  
continue to believe in the  
power of education to  
build a better country.

# To build a better country

A new agreement was signed with the Universidad Nacional de Colombia to continue awarding postgraduate scholarships to young people with academic excellence and social commitment, who do not have the economic resources to continue their studies.

This new agreement gives continuity to the joint work that has already allowed the delivery of 210 scholarships in Bogotá, Medellín, Putumayo and Amazonia, transforming lives and opening roads to a future with more opportunities.

# commitment to talent

As part of the shared value alliance with Spring Industries, we celebrate a new achievement in supporting the qualification and development of the company's human talent.

Awards were presented to the 6 employee graduates of the 2023-2024 cohort, who have successfully completed their training and have demonstrated their commitment to learning, professional and personal growth.

In addition, we are very pleased to announce that 5 employees have received new scholarships to start their graduate studies!
