Fundación JPGC

Empower Colombian leaders
through higher education

Alejandra Quintero
Master in Psychological Clinic
Ces University

Hello, I am Alejandra

I am scholarship student of the Fundación Juan Pablo Gutiérrez Cáceres and today I want to tell you how your contribution has helped me to follow my dreams and help my community.

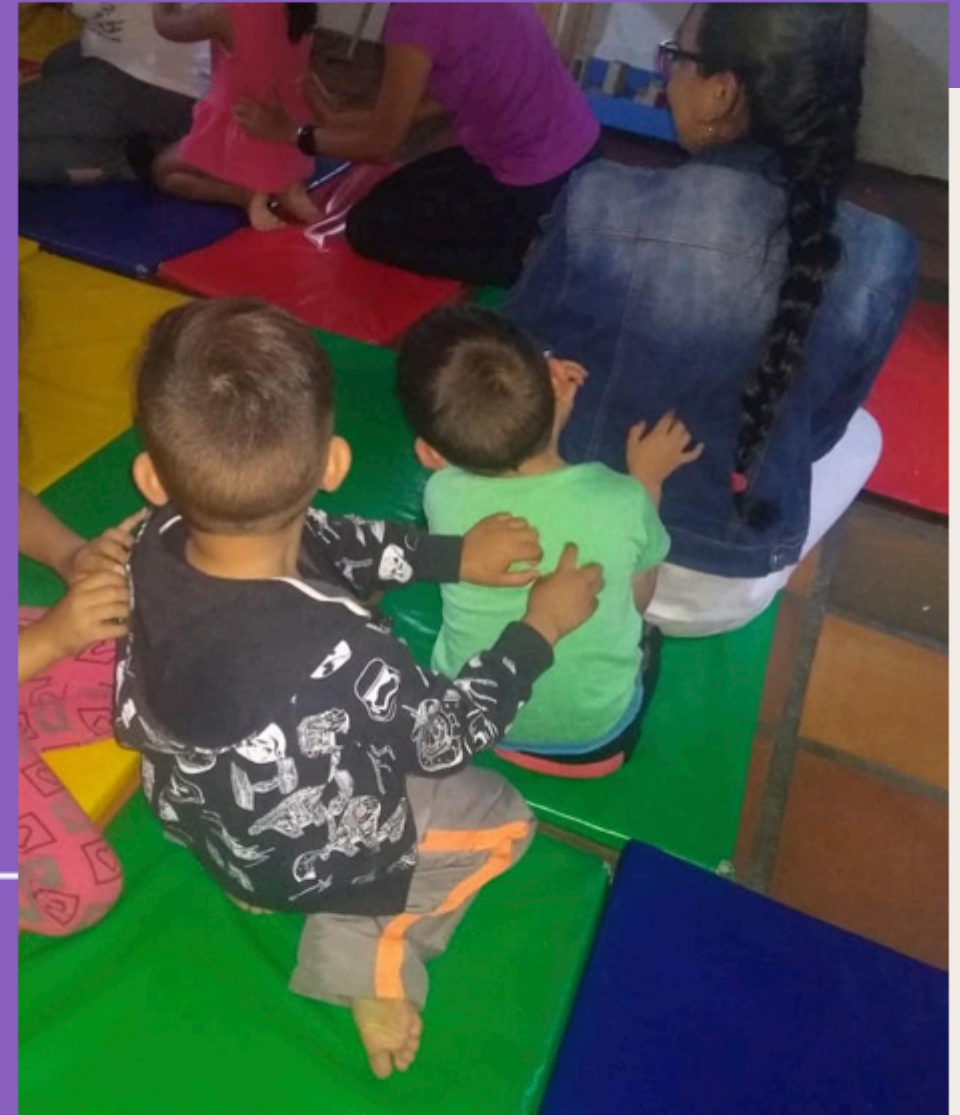

A scholarship does help

Having the support of the Foundation, allies and donors like you lowered my anxiety levels and motivated me a lot. It is a unique opportunity in life that has shaped me as a person to pass that strength to others.

Study is to advance And move on

I always considered that studying made a difference. Studying allows you to acquire knowledge to improve in the interaction with the other.

Open up to new opportunities, possibilities that I can explore, acquire tools to help, meet and interact with the people.

Study is to advance And move on

In my work, I reach a family and a child, but I know that it can become a chain with all the help and knowledge that I am transmitting.

That is why your donation, more than an expense, is a large investment that will be seen in the future, because we are going to positively impact our community, the Colombian population, the place where we are. From this knowledge that we are acquiring, from the experience we are having we can help others, people, families and children.

Other Testimonials

Alejandra Sabogal
Scholarship Student

If it were not for the support provided, it would have taken years to have the financial resources to study.

Lina Flórez
Scholarship Student

Studying has led me to grow professionally, improving living conditions and allowing me to move forward with my projects.
