LOS PIONEROS CALLAO

ASOCIACIÓN CIVIL LOS PIONEROS

INSTITUTIONAL SUMMARY

LOS PIONEROS is a non-profit organization founded on February 16, 1978 and constituted as an association on July 25, 2008

Our scope of action is the Constitutional Province of Callao - Peru; in the so-called sector of the Obelisk; which covers the neighborhoods of Chacaritas, Puerto Nuevo, Ciudadela Chalaca and San Juan Bosco; zones considered the most violent of Callao and with lack of opportunities.

The analysis of the problems of the area are: poor education, scarce possibilities of training for employment, inhalation of lead - this situation results in delinquency, gangs, violence, dysfunctional families, school dropouts, health problems, and consumption and drug marketing.

The social work of LOS PIONEROS is aimed at boys and girls between 06 and 26 years of age using sports, especially football as an intervention tool in this sector, currently having 200 frequent participants among its programs.

It is a long-term project, managing to maintain their participation in our institution for at least 10 years. Each year, some of them become young leaders who replicate their own process and improve it for the next generation.

The impact has grown from 30 direct and 150 indirect beneficiaries in 1978 to 200 direct and 850 indirect beneficiaries in 2017. The total number of beneficiaries reached by Los Pioneros since its founding is estimated at 2700 participants from the

We also have a pure female program that seeks social inclusion by securing their rights and achieving gender equity; these activities are organized in safe places like our office or in public facilities. In doing so we want to increase the active participation of women, empowering them and converting them into young leaders of society.

Our work approach is to develop a peaceful coexistence between the neighborhoods of Callao reducing their problems.

Our aim is mainly focused on realizing the human rights and gender equity. Furthermore, we focus on transmitting values like respect, honesty and solidarity and teaching skills and competencies for life.

To achieve the objective of the project, Los Pioneros seek the support of State Entities, Universities, Private Companies, NGOs, friends and family.

PROFILE PRESENTATION

About us?

We are an institution that uses Football for social transformation.

We promote the integral development of children, teenagers and adolescents contaminated by the inhalation of lead, who live in poverty and in areas of high violence.

We promote a peaceful coexistence, good treatment, conflict resolution as we develop our skills of working with the youth.

Mission

Promote positive changes in children, teenagers and adolescents of Callao, who are at social risk, improving their quality of life and learning through sports, art, education and culture.

View

To be pioneers in the creation of educating, safe, healthy and supportive communities in Callao, where every child, adolescent and young person with rights, participates and organizes to build inclusive and dignified life and development projects.

Values

The Pioneers are identified by honesty, solidarity, reciprocity and transparency.

Work Approach

For human rights, development and gender equality.

Beginning

Every child, adolescent has access to a quality education and health system and the power to choose their own destiny.

LOS PIONEROS CALLAO

School for soccer and values

These Soccer Schools are developed in vulnerable areas of Callao, being a socio-constructive learning space that provides security, confidence, self-regulation, encourages dialogue and promotes participation with the mediation football methodology.

Through football because of its convening and mobilizing nature, we promote social integration and the acquisition of positive values for life.

The work is aimed at boys and girls from the age of 6 years, using football fundamentally as a tool for social development.

Football Festivals for Equality and Peace

It is played with the mediation football method - mixed teams, no referee but instead one or two team members functioning as mediators. The team with the highest score in respecting the rules of coexistence not goals, evaluated in the 3rd. time of mediation, wins. By playing this game the participants receive instruments to mediate conflicts and learn the collective reflection of NO violence. The mediation method promotes peaceful coexistence, dialogue and values.

It is the opportunity to link children, adolescents and young people without opportunities and involve them in processes of change and development.

The game can be seen as an opportunity for growth. They can work together to find solutions with benefits for the entire community. Among the rules of coexistence that the teams normally agree on are for example: mutual respect, gender equity, fair play and teamwork.

In the Mediation Football methodology, there are NO REFEREES but MEDIATORS who may be trained educators or young leaders who will use a game form where they will note the rules agreed by both teams.

PROGRAMS

Women in action

It is a purely feminine program, achieving gender equity and rescuing their rights. Through this program we want to reach our objectives of increasing the active participation of WOMEN, empowering them and converting them into young leaders of society.

In addition to that, we have an activity called "Una Mirada Fuera de la Cancha", a peek outside of the court. We will train our kids to be mini reportes, interviewing people to know how they make their organization preparations outside the football field.

They also conduct interviews looking for comments on the social problems that women suffer, where the girls have the right to express their OPINION according to their ages and maturity. These videos will be shared on YouTube.

Barrio Heroes

In this program, adolescents and young people will be trained in theory and practice on football mediation, conflict resolution and various personal development workshops, training them as young change agents of the community.

It is not easy in a neighborhood so violent and so problematic to be an agent of change. That is why they are HEROES.

In the practical part they will be the monitors and facilitators of the programs of Los Pioneros, being responsible for groups of minors.

This group will be given certain tools to develop their activities such as youth meetings, festivals or others; and they will be trained to present themselves to the participatory budget of the Municipality.
