

Establishing long term relationships with individuals & groups to achieve optimal health.

HealthAid Uganda (HAU) is an NGO founded in 2007 and registered in 2010. HAU is a member organization under the umbrella of Uganda Cancer Society since its inception.

HealthAid Uganda (HAU) is a Non-profit organization whose goal is to reduce the burden of Reproductive Health cancers among women and men in Uganda and beyond through; Cancer awareness, screening and referral, patient support, training, advocacy and research.

Our vision:

A Nation with Optimal Health for all

Mission

HAU establishes long term relationships with individuals and groups to achieve optimal health for all.

We work across the health care system to promote better:

- Cervical Cancer awareness
- early detection
- Diagnosis, supportive treatment and care.
- HPV awareness and vaccination guide
- Capacity building of low level health workers in detection and referral of suspected cancer cases
- Social support

WHAT WE DO

HAU is a nonprofit organization providing the strategic direction for cervical cancer control in Uganda

We collect and use the latest cancer data, information and evidence to drive improvements in cancer outcomes.

Driven by the goals our strategic plan, HAU HAS 7 year history of working in partnership with all involved in the cancer community to:

- Reduce the incidence of cancer in the community
- Increase the survival rate for people diagnosed with cancer
- Improve the quality of life for people with cancer and their carers
- Provide a source of expertise on cancer control for the government, health service providers, medical researchers and the general community.

Find out how we're contributing to cervical cancer and HPV awareness.

WHAT YOU CAN DO WITH HealthAid

Mapping Local, National and International Innovations

Individuals and groups engage with HealthAid to search for health initiatives and engage health care providers / market to developing and implementing the strategic approaches that impact the communities
