

## Anti racism and discrimination project

**We at Music Mode are against Racism and discrimination! We will unite people and work with our youth to spread the message that there is no room for inequality, apartheid and prejudice!**

**We bring the youth together and write lyrics and produce music with a clear message against racism and discrimination! We will use Music as a powerful tool and reach millions of people around the world!**

**We want to build a music education centre where we can talk, educate, write songs and produce music tracks. In our Studio MIC we will record the songs!**

**The songs will be modern and based on the latest popular music styles, but with a clear message that we all are equal and there is no room for racism and discrimination in our world. Positive music that can be downloaded on all popular music platforms like youtube, spotify and soundcloud! Totally Free!**
