Dear Friends,

As the world is gripped in the present crisis and we all are fighting to get over situation, our students did manage to complete their academic year. The XII grade students wrote their Board Exams without any break while X and XI grades will appear later after the school reopens. There is lot of uncertainty but we are happy that our kids are safe and healthy with all your blessing and well wishes.

The previous months the students were engaged in various activities before the exam fever caught on with them. Few are new initiatives are also mentioned below

Science exhibition:

Science day was observed in our school on 28.02.2020 students exhibited some science experiments and science related fun activities which was attended by the other students of nearby schools. The students enjoyed explaining the fundamentals of science and real life applications.

Science day:

On 28.02.2020 GRI University was conducted various programmes for science day. Our 8th std P.Haripriya got IIIrd place for poster making to popularise science among the students. Other participates were received participant certificate on that day.

Edu Sports:

We have introduced sports activities in weekends and kho-kho, volley ball coaching in weekdays evening. The program is conducted by the edusports coaches.

Agastya Foundation Science Sessions

Agastya Science Van visits the school every month and conduct sessions on hands on science experiments for 6th to 8th students. The students are able to do science experiments and observe by themselves various science principles and laws that they read in the books.

Vegetables cultivation:

Students now maintain a small garden to learn about basics of farming and also to cultivate vegetables for their hostel mess. They feel happy in farming as well as they are getting nutritious food.

“We thank all our well-wishers for the continued support extended to us.”
