

We want to thank you for believing in our project and continuing to support us. During 2026, we continued with the educational gardens in three new kindergartens in the Quintero and Concón districts. The children are currently on summer vacation, so we'll resume everything in March. We also want to share that last December, we held an activity with our collaborators and participating kindergartens, which turned out to be a wonderful day filled with gratitude and love for the planet. Here are some photos from this closing event.
