

SAYARIY

RESURGIENDO

New paths, with positive steps.

We are a Peruvian nonprofit whose work focuses on the empowerment of disenfranchised communities and gender equality. SAYARIY enables people in the community to develop their gifts and abilities, thereby facilitating resilience, non-violent relationships, respect for nature, and awareness of the history and culture in which the community is situated.

OUR PILLARS

Empowerment

Community
work

Gender
focus

MISSION

To empower people who live in vulnerable situations and face social exclusion through activities and interventions which have a community and social justice focus.

It is key to encourage the collaboration and active participation of the community and social actors so that they can fully exercise their rights as citizens and move towards an inclusive, intercultural, and sustainable society.

VISION

We are an organization whose pillars rest on a model of sustainable community development. Each person has human rights and all voices have a space in our community, whose essence is a sense of respect, mutual care for one another, and the environment, with the aim of furthering this view within and beyond the community.

WHERE ARE WE?

We realize our work in El Porvenir district, one of the most populated districts in the outskirts of the city of Trujillo. We also work in the most remote zones of the city, such as Víctor Raúl V Etapa, Nuevo Libertadores, and Alto Trujillo. In these settlements, there are people whose roots lie in the Liberteñas highlands (mountains) and other places. These communities desire to move forward and take a stand against the limits, risk factors, and deprivations of their surroundings.

OUR PROJECTS

Our activities focus on projects that enable people in the community to develop their talents, abilities, and dreams so that they are aware their power to fulfill these. We accompany families during their early years and collaborate with local entities to negotiate basic resources such as water. Although the tenacity of community members makes daily living in a difficult environment possible, our labor seeks to alleviate the difficulties of living in vulnerable surroundings where undertaking projects comes with more obstacles. In this way, achieving personal wellbeing and a better quality of life in their environment.

1 | education

education

- Strengthening public schools through art, English, and sports a focus on gender equality.
- Community library: a flexible learning space through books and games. We join young children in discovering their abilities in a fun, safe, educational environment.
