

50 Guardians for Bahia Magdalena Mangrove

BAJA CALIFORNIA SUR, MX.

Thanks to your contribution we can begin to implement our project.
This is our Action Plan which we will carry out in the first 6 months:

Activity	Description	M1	M2	M3	M4	M5	M6
Management visit	First contact with the community to identify possible guardians.						
Training workshop	Training workshop with the first 20 potential guardians.						
Elaboration of allusive and informative signs	Signs allusive to the conservation of the site will be designed, printed and placed by the graduated guardians.						
Follow-up visit to trained guardians	The area will be visited to answer questions from the guardians and community, and to check the surveillance activity advances that have been made.						
Elaboration and follow-up of legal agreements with guardians	We will seek to make agreements with local fishing cooperatives that support the surveillance of the area to be protected.						
Follow-up of surveillance round logs	From the training, constant communication with the guardians will be maintained to integrate gathered information from the surveillance rounds.						
Final visit to show results and gather the next guardians to be trained	A meeting will be arranged to show results about surveillance activity, receive feedback, and gather the next guardians who will be trained.
