

MUJERES INDÍGENAS UNIDAS PARA LA RECONSTRUCCIÓN

## INDIGENOUS WOMEN UNITED FOR RECONSTRUCTION

The earthquakes that occurred in 2017 affected the lives of our families and community. With the support of the CODICE team and the support of Global Giving and the Semillas Fund, we have been working and advancing according to the Reconstruction Plan that we define jointly, with the aim of strengthening our capabilities and reducing vulnerability to disasters.

During this period we have oriented our work towards productive reconstruction.

We continue with the training activities, adapting to the eco-technologies, cultivating the vegetables, improving soil and water management, revaluing our natural heritage., With the “learn by doing” methodology

Looking for alternatives to produce improving, we have decided to know the cultivation of cocoa, since it is a plant native to Mexico and will bring us great benefits.

.We are getting to know cocoa, we want to produce the plant, grow it and process it, linking with other women who have the experience. That way we share and move forward.

Thanks for your support.
