

INDIGENOUS WOMEN UNITED FOR RECONSTRUCTION

March 2021

During the development of the project it has been important to share the learnings and listen to the voices and opinions of all of us.

Applying learnings

We continue working the horticulture and other foods organically.

Our encounter with cocoa

We receive the cocoa, we set up a nursery and now we know how to grow it.

We grow blackberries.

We buy blackberry seedlings and plant them in the vegetable gardens and on the plots. We already did a harvest

Thank you for your support and trust.
