

Hong Kong LGBT+ training for 200 Service Providers

In Hong Kong, LGBT+ people exists everywhere and in all kinds of occupations. However, sexual orientation discrimination and a lack of respect and understanding towards the LGBT community still happens. Gender identity issues may be a problem for some LGBT+ people when they need various services such as medical and counselling services. Providing training to service providers allows them to understand and meet the needs of the LGBT+ community.

In our project, there will be 4 sharing sessions and 5 education trainings for 200 service providers. There will also be 10 volunteer trainings for our volunteers and 2 exhibitions and some giveaways for public education.

In the long-term, we aim to promote communication between NGOs, service providers and the Hong Kong Government, provide volunteer trainings of different aspects so as to promote different LGBT+ works and to promote public education continuously.
