

Getting ready for a stellar start of the 26/27 school year!

[Buki.bg](https://buki.bg) – the educational platform transforming Bulgarian public-school education – starts its third school year. We are proud to report that 570+ teachers from 310+ schools from 150+ locations around Bulgaria have already subscribed for Buki programs for the new school year. And we are still enrolling more teachers and schools.

29 programs

We start the year with 29 fully developed and updated programs for 1 to 12 grades based on the feedback from teachers teaching the programs in the 25/26 school year. The topics cover a wide range of domains - from digital literacy, coding, green technologies, to AI, social emotional learning, financial literacy and other essential career skills for success on the labor market. The average duration per program is 36 learning hours. All programs are based on practical tasks that engage students' attention and build skills. This year we added to the portfolio a new Financial Literacy program for 5-7 grade. A full list, as divided by age groups, is [available on our website](#).

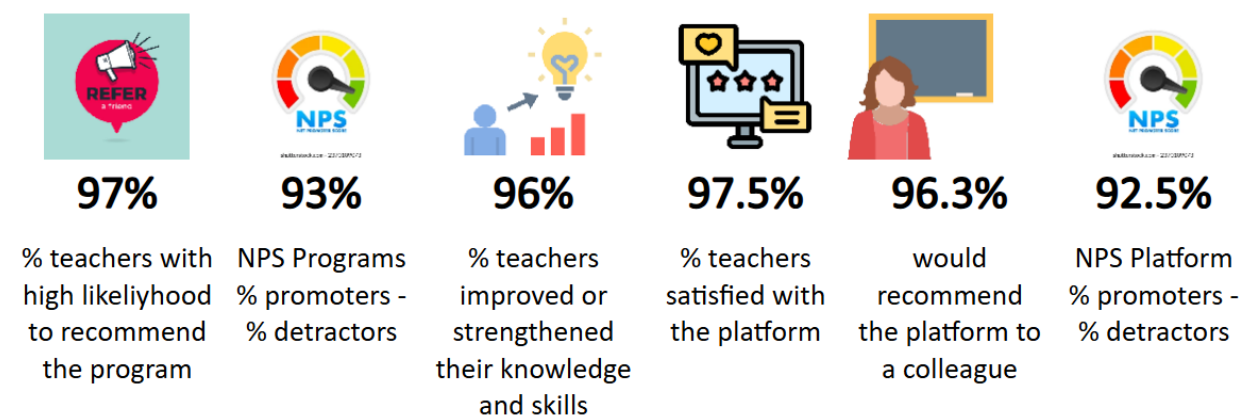

Thanks to you - our donors and supporters - during the current school year we are again offering free subscriptions to programs for every teacher and school so that no Bulgarian public school is impeded from getting access. In addition, eight programs remain entirely free for Bulgarian teachers.

Recap for the past quarter

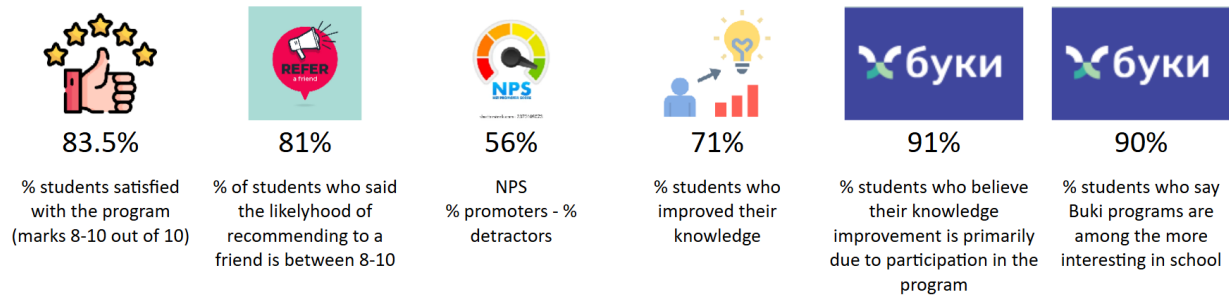

I. Collection and analysis of final data from the 25/26 school year.

We collected feedback and analyzed data from the teachers and students using the platform during the current school year. The data shows:

Teachers' feedback:

Students' feedback:

Among the most important findings was that 66% of teachers see a clear positive change in student behavior.

The most observed effects are:

- ✓ greater motivation and interest in the subject
- ✓ more active participation in class
- ✓ better communication and teamwork
- ✓ more mindful and responsible behavior

In social-emotional and character education programs, the change is most often seen in increased self-awareness, empathy, and better interaction among students.

In STEM and digital programs, it manifests as greater interest, concentration, confidence, critical thinking, and the ability to apply what they've learned in practice.

II. Finalizing our Annual Report

More details from our work and achievements during the 25/26 school year are published in our Annual report [here](#).

III. Public campaigns for the 26/27 school year

We continue to create regular educational content, promotional campaigns, and community engagement initiatives. These led to the results reported in the leading section of the report.

IV. Fundraising

The fundraising environment continues to be tough. Thanks to our true fans and donors who confirmed support for 2026/2027, we've already secured about **70% of our annual budget**. However, we need to close the remaining 30% in the next two-three months to sustain free access for the schools that need it most.

Thank you for your continued support

None of the above would be possible without the continued support of GlobalGiving donors and our entire network of supporters.

Together, we are proving that systemic change in public education is possible and continue to improve the quality of our work to ensure better prospects for Bulgaria's youth 🧡
