**Help us train and empower 100
Hydroponic Urban Farmers in Benin
City, Nigeria!**

*Project Summary

We seek to empower the disabled, widows and young adult orphans to earn a living wage through sustainable Hydroponic Urban Farming of regional & indigenous leafy green vegetables. Combining hydroponics and vertical farming techniques within stackable shipping containers is a simple agricultural technology which will enable the most vulnerable in society to become farmers while positively impacting Nigeria's food security issues caused by a cycle of poverty.

Our Mission - End extreme hunger and poverty by promoting the right to food for all. We will ensure access to food that is healthy and diverse for all people, all year round. We will work towards an end to malnutrition & hunger in all its forms as it is both a driver and an outcome of poverty and inequality.

AIM #1 Contribute to hunger alleviation in Nigeria by 2030, by increasing food security & improved nutrition through sustainable agricultural practices. **AIM #2** Provide information and/or services which will ensure healthy lives and promote well-being for all at all ages. **AIM #3** Create opportunities for jobs which secure livelihoods and end the cycle of poverty which leads to hunger. **AIM #4** Participate in multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology, and financial resources, to support the achievement of the United Nations 2030 Hunger Goals. **AIM #5** Promote Corporate Social Responsibility (CSR) towards ending hunger.
