**THANK YOU FOR YOUR
DONATION THROUGH**

We express our deep gratitude for your unconditional support in these first months of the year 2021; thanks for your donation, we were able to attend to 30 elderly persons (12 women and 8 men) who needed surgery. We are especially grateful for the trust placed in our institution; you are a pillar on which we sustain ourselves to attend more and more grandparents. We invite you to continue donating, so that together we can offer them the possibility of having a dignified life in the last stage of life.

Mr. Cesáreo, 81 years old, lives in the Miguel Hidalgo neighborhood in the municipality of Xochitepec, Morelos, he suffers from diabetes and has prostate problems and has lost vision in his right eye. Mr. Cesáreo lives alone, has four children, two of whom support him and visit him regularly. He does not have government health insurance to take care of his illness, so he looks for ways to take care of himself and buy his medications. He receives government support of approximately US\$60 per month. At the end of last year, Mr. Cesáreo was diagnosed with cataract and severe retinal problems in his left eye, and in January 2021, he underwent surgery. It is expected that Mr. Cesáreo, despite his advanced age, will continue to lead a normal life and enjoy good visual health that will allow him to improve his quality of life.
