# Summary

In the fourth Quarter of 2020, despite the conditions produced by the global pandemic, our institution continued its work. With donations received via the Global Giving platform and other alliances, it was possible to benefit 24 patients of the ophthalmologic clinic ACREC who had received diagnosis of cataract in one or both eyes. A socioeconomic study was made with each of the 24 beneficiaries to determine the level of economic support that could be offered to permit the surgery.

Among the 24 elderly persons receiving help with their surgery, 100% reported income less than double the minimum *per capita* salary. Of the total number of beneficiaries 46% were female and 54% male and the average age was 72 years.

On behalf of all these older persons who benefited, we give thanks for the recurrent and unique donations through which the miracle of returned sight has come to them.

## Mr. JOSÉ

José 81 years old, came from Santa Catarina in Tepotzlan, Morelos, Mexico. He lives with his son, daughter-in-law, two grandchildren and two greatgrandchildren. His daughter-in-law and a grandson provide economic support to the household through agricultural labor. His son is diabetic and also has visual impairment that prevents him working. The granddaughter makes tortillas for sale; she is separated and receives no financial support for her children.

Mr. José was diagnosed with cataract of the right eye in September 2020, and was operated on in November. His vision has recovered, and being fit and strong, he plans to return to the fields to bring support to his family.

## **To whom it may concern:**

By this means, let me express my great appreciation for the treatment which I receive from this clinic, and for the human consideration of your economic support in addition to the friendly, effective, considerate and professional attention.

Sincerely Daniel

# Mr. MARTIN

## **To whom it may concern:**

By means of this note I intend to offer my thanks for the programme that has given me the support to obtain the surgery of my left eye. You cannot imagine how grateful I am because it is so important to me to recover some sight after I was feeling so unhappy and unable to help my family. I am thankful that this type of support exists and projects that lend a hand to those who are unable or lack sufficient resources. Now I am able to hope for improvement of my sight.
