

REPORT

NOVEMBER-FEBRUARY

Visual health in the elderly population is a determining factor in maintaining stability, safety, and active participation in daily life. When vision declines, sensory function is affected: opportunities for interaction, mobility, and autonomy are limited.

Between November and January, ACREC strengthened its work focused on comprehensive care for older adults with visual impairments. Through specialized consultations, diagnostic tests, and timely medical procedures, the organization responded to needs that, if left unaddressed, could lead to greater physical and social complications.

Appropriate visual health intervention can prevent domestic accidents, reduce the risk of falls, and avoid the isolation that often accompanies progressive vision loss. It also helps people maintain independence in essential activities such as moving around safely, managing their medical treatment, and participating in family life.

This quarter's results show that access to specialized ophthalmological services has a direct impact on quality of life. Regaining or stabilising vision means regaining confidence, peace of mind, and the ability to continue leading an active life.

Every action taken during this period reaffirms our commitment to the dignity and well-being of older adults. Thanks to the support of those who believe in our mission, we continue to expand care opportunities for those who need it most, consolidating a model of intervention that prioritizes equity, professionalism, and human sensitivity.

Thanks to your valuable support, from November 2025 to February 2026, we provided 51 grants for eye surgery to people in vulnerable situations, giving them the opportunity to regain their visual health and significantly improve their quality of life.

Of the total number of beneficiaries, 61% were women and 39% were men, reflecting our commitment to inclusive care with a social focus, prioritizing those who face greater barriers to accessing specialized services.

Your donation was transformed into financial aid that enabled surgeries to be performed, interventions that not only represent medical treatment, but also the possibility of regaining autonomy, security, and overall well-being.

Each grant awarded is the direct result of the trust placed in our work. At ACREC, we manage resources responsibly and transparently, ensuring that each contribution translates into a real and measurable impact on the lives of those who need it most.

Your commitment makes it possible for more people to see the world with clarity and hope again. Thank you for continuing to be part of this mission that transforms lives.

Dear and valued Global Giving donors, I thank you for making this financial donation, as I did not have that much money. I had to borrow money to have this surgery, and with your support, I was able to do so.

I really need this operation to be able to do my own activities, as I cannot take care of myself. Thank you very much for your support, and please continue to financially support those in need like me. Thank you.

To whom it may concern:

I am grateful to the donors at Global Giving for their support, as I am a housewife and do not have the resources to pay for the surgery myself. With the support of my children, they borrowed money to complete the payment so that I could regain my vision and carry out my activities more independently.

I am truly grateful to the ACREC clinic and to all of you who made this surgery possible. Thank you.

A To whom it may concern – Global Giving Donors:

Through this letter, I would like to express my gratitude and respect for your support with the costs of my eye surgery, as it is extremely helpful for me to be able to regain my sight. I am a homemaker, and it was difficult for me to perform certain activities inside and outside the home. My family and I are grateful for your financial assistance, as we are low-income and work in the fields. I send you my regards and may God bless you.

Sincerely,
Concepción

Dear Global Giving donors:

I am grateful for your donation, as I arrived at the clinic with my health problem five months ago. They told me I needed surgery, but I was only taking care of my home and my sisters, and I didn't think we could afford it. Thanks to your support, and that of my sisters and niece, I was able to get my surgery appointment today. I sincerely thank you for all your support and hope that, like me, you can help more people. May God our Lord bless all those who work for Global Giving and their families.

A hug from afar from my family and myself,

María Luisa
