Rutshuru/Rubare  
Rue du centre de santé  
Maison Carlo-Volpato

**Nearest port:** Port de Das-es Salam in Tanzania

### Details about the computers

6 desktops  
10 laptops           **Model:**   HP and LENOVO

iCore 7 processor  
16 GB RAM  
500 GB HDD (128 for SSD)

### Why

With the aim of reinforcing a work in synergy between the actors of a civil society, with the aim of approaching and initiating the students, the teachers and the human rights defenders of the rights to get access to the modern technology of the information, LISVDHE would like to equip its documentation center with machines connected to the internet.

However through her project "**Access to justice for all**", with the aim of looking to protect human rights defenders from authorities threats, LISVDHE had to look facilitating human them exchanging easily informations. There for, to realise this, she asked a help from a french organization named AEDH. And this, had given to LISVDHE 2 laptops machines.

A part from the human rights defenders, students and teachers were allowed to make their researches in this documentation center. Currently these machines are not enough because the demand is going hights up on more than 50 people per day. That's why we would like to strengthen this center with machines.

This project benefit not only for the organization, but also to human rights defenders, to students and to teachers. That is why LISVDHE is in need of other computers.
