He is a board member leading the education sector of International Partnership for African Growth - South Africa

He is a board member/director of operations at African Student Entrepreneurship Program

Godspromise is an alumni of common purpose and holds a leadership badge award from common purpose, United States

He is a member of the President Barack Obama's Initiative (YALI)

His decision to become a social entrepreneur was borne out of his personal experience and strong passion to contribute to the social and economic development of Africa.

PROJECT INFORMATION

PROJECT TOPIC: EDUCATE 200 STUDENTS WITH SPECIAL NEED IN UYO ON COMPUTER AND INTERNET LITERACY

LOCATION: SPECIAL EDUCATION CENTER, MBIABONG ETOI. UYO, NIGERIA

PROJECT DESCRIPTION

The Problem:

There is an alarming number of disable children from rural communities that lacked access to basic and quality education in Uyo, Akwa Ibom state. According to our research, there is 270,000 children with special need in Uyo, Akwa state and only 10,000 out of 270,000 have access to basic and quality education.

This is because there is only one school for children with special need in the entire state. Instead of allowing 260,000 lack access to basic and quality education, iSkill Network through iRuRal will educate them on computer and internet literacy.

The Solution:

This project plans to educate 200 student with special needs from rural areas in Uyo, Akwa Ibom state on computer and internet literacy to help them live in a world of possibilities by using a computer with access to the internet; they can increase their knowledge, take up an online course, learn and study even at their homes. Therefore, all students can be placed on equal footing to get the necessary basic and quality education.

Goal: This project will empower 200 students with special need in Akwa Ibom state to access basic and quality education.

Objective: 200 children with special need in Akwa Ibom State that lack access to basic and quality education will be educated on computer and internet literacy

Expected Outcomes: 200 children with special needs participating in the program will have access to basic and quality education by using a computer and connecting to the internet, they will take up courses, learn and study even at their homes.

Long Term Impact:

The project will educate 200 students with special need on computer and internet literacy, which will help them rise out of illiteracy and access basic and quality education by using a computer and accessing the internet, they can take up online courses, learn and study even at their homes.

When this 200 are Educated, they will help educate other students with special need in their community to access basic and quality education by educating them on computer and internet literacy.

This will place all students with special need on equal footing to get the necessary basic and quality
