

sponsorship program

For many children in Zambia, receiving an education is a privilege rather than a right. Our Sponsorship Program is designed to address the financial barriers that prevent many children from accessing the education they deserve.

Sponsorship provides the child with a uniform, books, a daily healthy meal, computer literacy, learning resources and contributes toward the running costs of the school.

If you are interested in finding out more about sponsoring a child, please contact us:

“

I'm so blessed to have received sponsorship at Baobuyu as it has allowed my daughter to have the best education that I could ever imagine.

”

about us

Baobuyu Learning Center is a pre-school and community center in Mwandi compound, found in Livingstone, Zambia.

Our aim is to provide as much free education for the community as possible. During the day, our pre-school provides a safe environment for students to develop a range of skills that will make them ready to learn when they start school.

In the afternoon and on weekends, the school acts as a community center where we provide FREE education and workshops for the wider community. Courses cover topics which include health talks, girl empowerment classes, skills training and HIV education.

Baobuyu Learning Center

girl power

Many girls in the community lack sufficient guidance and information around important issues such as puberty, drugs and alcohol, relationships, careers and effective communication. Girl Power provides the space to address these issues, as well as providing an opportunity for our girls to just be girls - something we can often take for granted.

vision for women

Vision for Women is our women's empowerment group, who meet regularly for sessions covering topics ranging from skills training to health talks, and entrepreneurship to cooking lessons.

Equally as important, the group provides the opportunity for women to connect with other women in their community. Educating our women is important as we have seen first-hand how they pass what they have learned on to their children - and this is how change happens.

“

education is the most powerful weapon which you can use to change the world

”

pre-school

Baobuyu Learning Center caters for pupils 2.5-7 years old. We have a strong focus on interactive and visual learning, and we keep class sizes small to provide plenty of individual attention.

Our pre-school provides children with the opportunity to learn a wide range of important skills, providing a strong overall foundation for success in future schooling.

We take pride in offering unique activities at our school, including cooking classes, computer literacy, gardening and conservation education; all of which we believe are important for our students overall learning experience.
