

Identify and Support Issues with Reading

This is a two-part workshop. You can attend one or both workshops. The first workshop will focus on learning how to read. The second workshop will focus on understanding what you read.

In both workshops, participants will experience what it's like to have some common processing issues in reading and understand which skills they impact. They will learn how specific multisensory techniques help to develop the skills that contribute to becoming a successful reader. Finally, we will discuss resources that address each skill area for use at home or at school.

Beth Powell is a Learning Specialist who has helped hundreds of students learn to read using a variety of researched-based, multisensory programs and cognitive therapies. She has worked in education for over 25 years and enjoys helping parents and teachers learn how to support struggling learners.
