Total US\$135,993.51

#### OPEN LETTER TO YOU OUR CHERISHED PARTNER

Dear Donor,

Thank you so much for your support to aid the construction of 3No. 5-Unit Classroom block with ICT and library for the Apuayem, Akyena and Akwaboa communities in the Atwima Nwabiagya Municipality of Ghana.

Every child has the right to education but in the abovementioned communities, education has become scarce to children. Children within the age group of 6-12 years are walking an average distance of 4.4km through bushes to access a school in nearby communities.

As a result, these children from the abovementioned communities perform poor academically due to the fact that, they are always tired for academic works. Parents in these communities are also scared for the lives of their wards so they do not allow these children to go through bushes to access school until they feel the children are grown enough to cover the distance.

We believe working together to solve the problems in the world particularly in the rural communities is the ultimate reason why CIRCDev and you exist in this world.

We kindly seek your support once again to donate towards the construction of this school facilities to improve the social well-being of children in rural communities. This problem perpetuates poverty in these communities since these children grow to become the youth and adults are limited to employment opportunities and fail to see the outside world as result of lack of education.

We look forward to working with you to put a smile on the faces of children and parents in these rural communities.

Sincerely,

Francis Sarkodie
Executive Director

#### PROBLEM STATEMENT

A child without education is like a building without foundation. In this case, education is a means to development of every community. Rural communities in the Atwima Nwabiagya Municipality of Ghana have problem with limited social amenities which is educational facility is one of them. About 90 per cent of rural communities in the Atwima Nwabiagya Municipality have no educational facility. The rural communities that have educational facility, have a dilapidated facility which children spends their school time under tree studying. The situation of Apuayem, Akyena and Akwaboa community is worse than expected. Children from these communities walk an average distance of 4.4 kilometers to access a school from nearby community.

As a result of this phenomenon, children between the ages of 6-10 years do not go to school in these communities. Report from the schools near to these communities indicate that, children from these communities are always late for school and are not punctual due to the distance the cover. 2 out 10 children complete their basic education in these communities.

Child labour is a major issue in these communities as a result of the lack of educational facility in these communities. Children between the ages of 6-12 years who cannot walk the distance of 4.4 kilometers to school walk even longer distances to farm. Parents from these communities justifies why they take their children to farms with the reason that, there is no one in the home to take of the children when they are away and these children too cannot cover the distance to access a school.

Averagely, these communities have a total population of 602 with 15.2 per cent being children. Children population in these communities is expected to grow at the current growth rate of 2.7 of the Municipality. The implication is that, a lot of children from communities with similar or same characteristics like Apuayem, Akwaboa and Akyena risk attaining education and also the situation will increase the number of child labour cases in these communities.

This situation is affecting the development of the Atwima Nwabiagya Muncipality and the general development of Ghana and it is in this light that the Center for Integrated Rural and Child Development, a local NGO operating in the Atwima Nwabiagya Municipality has designed a project "Build a school for 3 rural communities" to provide these communities with an educational facility to help improve the social well-being of children from these community.

## PROJECT SUMMARY

"Build a school for 3 rural communities" is a project which seeks to provide educational facility for Apuayem, Akwaboa and Akyena rural communities in the Atwima Nwabiagya Municipality of Ghana. The project seeks to put up a 3No. 5-Unit Classroom block with Library and ICT facility to help improve the social well-being of children from the abovementioned rural communities.

This project seeks to support the Self-Help development of rural communities in the Atwima Nwabiagya Municipality and inculcate a sense of ownership in project beneficiaries to enhance project sustainability. Our research indicates that, projects that are given to beneficiaries entirely free are not managed well. There is this adage that, "expensive items are good" so this concept is being translated into project implementation. Beneficiary communities will be made to initiate the project with their community fund for others to come and support. Apuayem, Akyena and Akwaboa communities have been selected for this project because, these communities are made preparation towards solving their problem.

The project seeks to improve the reading skills of children in these communities. It is also to give children from these communities digital knowledge and help them partake in the international ICT day celebration.

## **Project Description**

The project is a constructional project. It is to put up a 3No. 5-Unit Classroom block with Library and ICT facility for the people of

Akwaboa, Akyena and Apuayem in the Atwima Nwabiagya Municipality.

## PROJECT GOAL AND OBJECTIVES

The broad goal of the project is to provide rural communities educational facility to bridge the educational gab of rural communities and urban communities in the Atwima Nwabiagya Municipality. However, the following objectives are to be achieved in order to achieve the goal;

- 1. Build a 5-Unit classroom block with Library and ICT facility for Apuayem community by the end of 2019
- 2. Build a 5-Unit classroom block with Library and ICT facility for Akwaboa community by the end of 2019
- 3. Build a 5-Unit classroom block with Library and ICT facility for Akyena community by the end of 2019

### PROJECT OUTPUT

At the end of the project, the following output are expected to be achieved. It is expected that,

- 1. A 5-Unit classroom block with library and ICT facility built for Akwaboa, Akyena and Apuayem communities,
- 2. Children from these communities are in school at the school going time and days but not in the farm.
- 3. Children between the ages of 6-10 years and even lower do not walk 4.4 kilometers to access school

## PROJECT OUTCOME

The project seeks to achieve but not limited to the following outcomes. It is expected that;

- 1. The community's negative perception about education is changed,
- 2. Social well-being of children from these communities have improved,
- 3. Child labour of all forms as a result of the lack of the educational facility is eliminated

## IMPLEMENTATION ARRANGEMENT/ACTIVITIES

The following the activities to be carried out during the implementation of the project;

- 1. Formation of an implementation committee for each of the three communities.
- 2. Establishing community fund
- 3. Organizing community fundraising event to raise money to support the project
- 4. Clearing of site
- 5. Write sponsorship letters to key people from the community and other companies
- 6. Foundation works on the site
- 7. Initiating actual construction of the school in the various communities.

## PROJECT OUTPUT/OUTCOME/IMPACT SUSTAINABILITY

To sustain the output, outcome and impact of the project, the following measures will be instituted;

- 1. Establishing a maintenance and renovation fund. This fund will be manage by the project committee, school management committee and the traditional authority in the various communities. Parent will be made to pay GHc 1.00 every week.
- 2. The school will be handed over to the government to ensure the children enjoys the school feeding program of the government. However, CIRCDev will look for sponsors to enhance and support the school feeding program of the government.

#### **ABOUT CIRCDev**

Center for integrated Rural and Child Development (CIRCDev) is a registered nonprofit organization aiding the alleviation of poverty in rural communities with emphasis on women, youth and children in Ghana. CIRCDev was established in 2015 with the aim of improving rural communities and also improving the total well-being of disadvantaged groups in rural communities in Ghana. CIRCDev was formed out of a research conducted by the Development Planning Unit of the Atwima Nwabiagya District in 2015 which is now a Municipal

#### **OUR GOAL**

CIRCDev seeks to assist in rural development and provide for the total well-being of women, youth and children in the various rural communities in Ghana

#### **OUR OBJECTIVES**

- ✓ Promote and facilitate the total well-being of women, youth and children.
- ✓ Promote and facilitate the development of rural communities.
- ✓ Contribute a quota in achieving the Sustainable Development Goals (SDG) and Africa agenda 2063.

#### **OUR MISSION**

To aid the alleviation of poverty in rural communities and provide for the total well-being of women and children through provision of development needs by collaborating with authorities, groups and organizations to implement programs.

#### **OUR VISION**

Our vision is create an enriched local community that adequately supports the total development of women and children" through the provision of social needs, economic opportunities and infrastructure.

#### AREAS OF INTEREST

CIRCDev is interested in the following areas to enhance poverty alleviation. CIRCDev also conducts research into issues affecting the development of women, youth and children as well as the total development of rural communities.

### ✓ Women and Girls Empowerment and development (WED)

Since our establishment, CIRCDev has been able to achieve the following under our Women Empowerment and Development program. Since 2015, CIRCDev has been able to train 228 rural women and fully supported 99 and shared cost with 129 women 12 of these women are physically challenged. CIRCDev's approach to empowering women is to identify their problems with them and also find solutions to the problem with them in order to ensure sustainability of the identified strategy to solving their problem. The women have been trained in the following; Bead Making, Soap Making, Liquid Soap, Bleach, Hair Shampoo and Conditioner, Washing powder, Antiseptic, Fabric Softener of and Mushroom farming

These women are also given financial management and book keeping training in order to ensure the sustainability of their business. Pictures of these training programs have shown below.

## ✓ Child Development

CIRCDev interest in child development is anchored on the fact that, children are the most affected as far as poverty is concerned. Since CIRCDev's establishment, 135 children have been supported with their educational needs. Parents of these children have also been empowered economically to take care of these children.

To ensure Girl-Child Development, CIRCDev has formed functioning Teens' Club in 14 basic schools in 14 rural communities in the Atwima

Nwabiagya to mentor them and also give the knowledge in ICT. Below are some evidence to our child development program.

### ✓ Rural Development

Rural communities are faced with numerous problems and it is at the heart of CIRCDev to ensure the development of rural communities in the holistic approach by identifying their problems and planning with them to find innovative means of solving their problems. CIRCDev has initiated a project dubbed "Engaging local communities in the decentralization concept to enhance poverty reduction". The project seeks to sensitize rural dwellers on the duties of the Assembly Member and also get the chance to access the performance of their Assembly Member. The project also seeks to identify problems and help community to design their Community Action Plan to inspire Self-help development. CIRCDev has sensitized 28 communities out of the target 40 communities.

### ✓ Youth empowerment and development (YED)

Youth unemployment is one of the major problems affecting the development of Ghana. CIRCDev is empowering both educated and uneducated youth in the rural communities and even in the urban centers of Ghana. CIRCDev has instituted a program called "After Service; what is next?" to provide entrepreneurship skills to the youth who about to complete their National Service to inspire them to start a business after service. This program started in 2016 and 146 national service personnel of which 61 are females have received training in how to start their businesses.

CIRCDev also empowers youth in the rural communities through consultation to identify what they want to do with their lives and give them the skills they require to become self-employed. CIRCDev has been able to train and supported 105 youths from the 7 rural communities in the Atwima Nwabiagya Municipality.
